Dear (b) (6).

Two highly experienced and qualified NSF officers are available to join the working meeting on Tribal Consultation.

Robert Delgado provided initial, helpful input to us a couple weeks ago. Roberto is available next week but he is not available the week of the 14th.

Erica Hill, who has been working on the OSTP guidance for indigenous knowledge engagements, is available the week of the 14th.

I have copied them on this note so that (b) (6) has their e-mail addresses for polling purposes. I would like to attend the session if it works for my calendar, in order to learn. But I am optional in this case. Having either Roberto or Erica (or both) at your meeting will be the way to gain maximum value.

Kind regards,

Jack

Hi all,

Thank you for agreeing to link up on our Tribal Consultation and listening session ideas for the NNA. I'm copying (b) (6) here to help us find a time. She'll be in touch and we'll aim to find 45 min in the next two weeks to discuss. Our topics will be:

1. How should we design the formal Consultation to provide sufficient times to discuss the content in the RFI, and what timing will make the sessions most accessible? Should we do information session(s) in advance?
2. What is being planned through the DOI outreach for engagement with Native communities?

3. What additional engagements should we do beyond these 2 processes?

Thanks all, looking forward to it,

(b) (6)

Dear Erica

I am writing to see if you might help with an Executive Office of the President (EOP) Climate Activity.

The USGCRP – which I anticipate you know is an EOP interagency body -- has been asked by Congress to create a National Nature Assessment. The first report of its kind for the US.

The group that is steering the design of the report will begin with stakeholder engagements, including listening sessions and similar. We want to be sure to include the best possible advice from our various agencies. Roberto has provided initial help to the group.

The steering team wants to schedule a working session with our agency reps who are highly knowledgeable about tribal engagements particularly. The meeting will seek input on potential designs for the stakeholder activities including a Dear Tribal Leader letter. They aim to set up the meeting in the next two weeks.

A bit of additional detail is in the e-mail stream below.

Roberto has provided initial input to the steering team. He is available next week but not the week of the 14th. He recommended you as an appropriate and valuable alternate if the meeting is in the week of the 14th.

Would you be available and willing to help by joining the working meeting?

I am happy to discuss if you would like. And my fingers are crossed.

Kind regards,

Jack

Dear Climate and Tribal Consultation Colleagues,

Per below, the National Nature Assessment wants to hold a meeting in the next two weeks to discuss the content of a possible Dear Tribal Leader letter and design for a series of engagements. The steering committee was offered the opportunity to join the discussion and what I offered was that someone more knowledgeable than I from NSF should join.

I shared input from Roberto with NNA previously. It included a lot of really useful advice and ideas. But I am not sure if the NNA leadership had a chance to really digest it. Would you like to (would you be willing to) help by joining this conversation, Roberto? And is there someone else who feels they should really join in, to save the NNA from lessons you have already learned well? I don't think it would hurt for NSF to ask to have more than one attendee.

So: what do you think? Do you have interest and bandwidth, Roberto? Others?

Thank you for considering.

Kind regards,

Jack

Hi Erica,

Thanks for your patience, I've finally made it back to the office. This information is all great, and I'll be sure to have everything in by the end of the week. In good news, one of my manuscripts from this work has just been accepted for publication as well! I will add pre-prints for now and be sure to include the final versions when they are laid out and publicly available. Thanks for your help with all of this!

As for potential future projects, I'd love to speak with you soon about a few ideas I've been mulling over as I transition to research faculty at (b) (6)

All the best,

Victoria

On Mon, Jun 13, 2022 at 1:34 PM Hill, Erica <erhill@nsf.gov> wrote:

Dear Victoria,

Apologies for taking so long to get back to you. First, no worries about the overdue report, as long as we're working on it.

I would recommend that you work with the Arctic Data Center to deposit project *metadata*, along with links to publications and CAFF. Any data that is non-sensitive can also be deposited there, but depositing metadata will fulfil the minimum NSF requirements.

Yes, I agree that the CAFF report can be considered a product of this award. Please enter it, the Wilson Q article, and anything else you can into the NSF Public Access Repository (PAR), here:

https://www.nsf.gov/news/special_reports/public_access/about_repository.jsp

If publishing contracts prohibit deposit of the final, laid out, published version, then you may deposit "pre-prints".

Once you have those other manuscripts in print, you can come back to the PAR and enter them, so they will be associated with your award as "outputs." And please make sure to acknowledge NSF support in each publication. Let me know if you need assistance with the wording.

I think that answers your questions. Let me know if you need anything else. Again, congratulations! And get in touch if you ever want to discuss your **next** NSF project!

Best wishes,
Erica

Subject: [EXTERNAL] - NSF Award 1934497 - Final Project Report

This email originated from outside of the National Science Foundation. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hi Erica,

Thanks very much for your congratulations! And apologies on my end with the reporting process. This is my first time submitting an NSF report on my own and I should have been in touch earlier to make sure I had everything in order. I have a few questions below, if you've got the time.

First, and perhaps most importantly, my data is sensitive as it mostly contains Indigenous knowledge of subsistence resources, activities, organizing, and ongoing work and research that isn't public or published. My IRB with the (b) (6) [REDACTED] included protections against publishing the data in public repositories, and I do believe that is reflected in my data management plan. I believe it is also supported in the documentation I have published with my dissertation. Can you advise if and how I can best go about receiving a more formal exemption for publishing my data? I can certainly include the DOIs of derived products (dissertation and possibly CAFF report (see below)) to the Arctic Data Center.

Second, my CAFF publication was formally published, but it had been expedited and actually published December 2019, just before the grant period was set to begin (I remember we had some delay in my grant review). I still consider it an important product of this grant, and I was able to spend additional time during this grant with that particular data for the manuscripts coming from my dissertation. I would like to include the CAFF publication as a grant product, but please advise if this is acceptable given the early publication date.

Third, my three manuscripts are currently in review and not yet published, so I don't believe that I can include them as products at this time. Are these products I can include later? I can certainly link to the Wilson Quarterly piece and the other public-facing pieces I included in the final report.

Fourth, I'm actually on leave at the moment, and am fly and out of service until Tuesday. What should I do about the report deadline tomorrow? I wouldn't want my old PI to be alarmed with any overdue messages. Is this something I can take a few days on or do you need it ASAP?

Thanks for all your support! This program really made a lot of good work happen and I'm very grateful.

All the best,

Victoria

AMENDMENT INFORMATION

Amendment Type: New Project

Amendment Date: 04/05/2023

Amendment Number: 000

Proposal Number: 2321022

Amendment Description:

The National Science Foundation hereby awards a Standard Grant for support of the project described in the proposal referenced above.

Please read the components carefully as they outline specific requirements for receiving this funding.

1. Principal investigators and their teams are required to comply with the OPP Data Management Policy (NSF 22-106) (<https://www.nsf.gov/pubs/2022/nsf22106/nsf22106.jsp>) and evidence of compliance is required in annual and final project reports. In all project reports submitted to NSF, principal investigators must address the status of storing metadata files, physical/biological/archaeological samples, full data sets, and derived data products into long-lived and publicly accessible archive(s).
2. Participants in research supported by NSF are expected to follow the 2018 Principles for Conducting Research in the Arctic (<https://www.nsf.gov/geo/opp/arctic/conduct.jsp>) adopted by the U.S. Interagency Arctic Research Policy Committee (IARPC). Investigators may find useful these resources from NSF and resources (<https://www.nsf.gov/geo/opp/arctic/ace/>) from ARCUS (<https://www.arcus.org/resources/northern-communities>).
3. Principal Investigators are expected to specifically address progress on activities related to proposed Broader Impacts and any postdoctoral mentoring in annual and final reports.
4. As part of the Office of Polar Programs efforts to increase diversity and inclusion in the Antarctic, please seek to recruit qualified students and others working on your project from historically underrepresented groups in STEM, e.g., women, minorities, persons with disabilities, LGBTQ+ students and veterans. Diversifying and broadening participation is a priority for the Arctic Sciences Section.

The "Administration of NSF Conference or Group Travel Award Grant Conditions (FL 26)" in effect the date of this amendment are applicable. The FL 26 special award conditions can be found at:

https://www.nsf.gov/awards/managing/special_conditions.jsp.

Funds provided for participant support may not be diverted by the awardee to other categories of expense without the prior written approval of the cognizant NSF Program Officer. Since participant support cost is not a normal account

classification, the awardee organization must be able to separately identify participant support costs. It is highly recommended that separate accounts, sub-accounts, sub-task, or sub-ledgers be established to accumulate these costs. The awardee should have written policies and procedures to segregate participant support costs.

Incentive payments or gifts to participants must be made in accordance with written institutional policies and procedures and supported by auditable documentation. The allowability of these costs will ultimately be based on the awardee institution's ability to adequately demonstrate that the incentives have been disbursed in accordance with its policies and procedures.

AWARD INFORMATION

Award Number (FAIN): 2321022

Award Instrument: Standard Grant

Award Date: 04/05/2023

Award Period of Performance: Start Date: 04/15/2023 End Date: 03/31/2024

Project Title: Travel: Fostering Rural and Indigenous Knowledge Sharing on Caribou

Managing Division Abbreviation: OPP

Research and Development Award: Yes

Funding Opportunity: NSF 21-526 Arctic Research Opportunities

Assistance Listing Number(s) and Name(s): 47.078 Polar Programs
(Predominant source of funding for SEFA reporting)

GENERAL TERMS AND CONDITIONS

This is awarded pursuant to the authority of the National Science Foundation Act of 1950, as amended (42 U.S.C. 1861-75) and is subject to Research Terms and Conditions (RTCs) dated 11/12/2020, and NSF Agency Specific Requirements, dated 01/30/2023, available at <https://www.nsf.gov/awards/managing/rtc.jsp>.

This institution is a signatory to the Federal Demonstration Partnership (FDP) Phase VI Agreement which requires active institutional participation in new or ongoing FDP demonstrations and pilots.

This award is made in accordance with the provisions of NSF Solicitation: NSF 21-526 Arctic Research Opportunities.

Subject: Re: [EXTERNAL] - NSF OPP proposal follow up

Dear (b) (6)

I'm so glad you found our meeting helpful. As long as your fellowship topic addresses EAR science questions, the EAR program would consider your fellowship proposal. But the best way to check is to draft a one-page summary (like the first page of your proposal) that you think fits the EAR program description, and send it to Aisha Morris at armorris@nsf.gov

I'd definitely recommend that tailor your proposal to EAR--in other words, go through and make sure that your proposal hits EAR priorities, rather than emphasizing the Arctic context, which is what OPP is after.

Ask Aisha for her feedback, and simply indicate that you applied to the OPP PRF, but you think the project may be a good fit for EAR. Aisha should be able to give you a good 'read' on whether your project would be competitive in EAR.

And, if you're still eligible for the OPP PRF in February 2023, you could apply again to OPP. It's fine to submit to both PRF programs, as long as you inform the program officers that you have a simultaneous submission and declare it on the Current and Pending document required with submission. Again, don't submit the exact same word-for-word proposal to both programs--tailor each to the priorities of EAR versus OPP.

Best wishes,
Erica

Erica,

Thank you for taking the time to walk through the reviews of my proposal a couple weeks ago. Your words provided me with actionable and concrete advice to improve especially the broader impacts section.

I am reaching out to ask you about your thoughts/opinions about submitting a revised version of my proposal to the NSF EAR postdoctoral fellowship solicitation (October 26). I believe the proposed scope of my falls under the theme of the solicitation but was wondering if you knew if they would not consider polar research as competitive since the OPP fellowship has been brought back online.

Sincerely,

(b) (6)

Thank you Erica! I am thankful for these insights, as those are just the type of questions I had.

This week has been swamped, and I apologize for not responding sooner. I appreciate your offer to have a quick conversation, and would like to schedule that if you are still willing -- or we can stick to email, if you prefer. I'd be interested in what the day-to-day work is like, as I don't have a good sense for that, and I'd also be interested in your insights as to what the selection committee might be looking for.

Thanks so much -

Subject: "[EXTERNAL] "NSF opportunities

Hi (b) (6)

I'd be happy to discuss the position—which is really a fabulous opportunity. Being a program officer provides unparalleled insight into how the funding process works from the inside—something I wish I'd known earlier in my career. The Arctic Section, where I'm assigned, is a very collegial and supportive bunch of super smart and high functioning people. The Arctic Section is also heavily involved in federal (Arctic) policy advising. We're involved in Arctic Council committee work, interagency work, and the international Arctic science diplomacy space.

I can't speak to work in other directorates and offices. The Political Science and Security programs are both located in a different directorate than I am—they're in Social and Behavioral Sciences, and all the program officers there are social scientists. The Arctic Section sits in the Geosciences directorate, so most of my co-workers are glaciologists, oceanographers, and geomorphologists.

This job is a good fit for someone with broad interests looking for a stimulating work environment. I took this position just after I made full professor, when I started wondering "what next"?

I'd be happy to talk further about it via zoom, or answer any other questions you might have. (b) (6)

Hi (b) (6)

Thanks again. I'm actually on detail to NSF from my home university in Alaska, and my term will be ending in a year. So we're looking for someone to start in 2022 so they can overlap with me for a few months before I leave. This position can be for as little as one year or as much as three years.

Best wishes,
Erica

(response requested by 3/2)

This email originated from outside of the National Science Foundation. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hi Everyone,

I'm reaching out to you as you've indicated interest in participating in the Research working group of the NSTC's Indigenous Knowledge Subcommittee. We'd like to set up a monthly standing call for the Research working group to simply coordination and communications.

Part of our initial meetings will be discussing the scope of the Research working group, but I've included a draft charter statement below as a frame of reference to help you assess your interest in the working group.

Research working group's draft charter statement:

Federal research agencies working together to share best practices and resolve common issues related to enhancing Indigenous Knowledge use within research contexts. The focus will be on areas unique to or especially challenging within the research context. Some example areas: data sovereignty and open data policies, data management, best practices for

citing IK, grantmaking and other relevant topics specific to research contexts and IK.

Your availability:

Please reply to me and indicate your availability for each of the following options as "yes" or "no". I'll then see which date/times might work best for the group or if none of these are good options. In each case we are thinking a monthly meeting for 1 hour for the date/time listed.

- 2nd Mondays at 4 pm eastern (3 pm central, 2 pm mountain, 1 pm pacific, 12 pm Alaska, 11 am Hawaii)
 - Examples are April 10, May 8
- 2nd Wednesdays at 12 pm eastern (11 am central, 10 am mountain, 9 am pacific, 8 am Alaska, 7 am Hawaii)
 - Examples are April 12, May 10
- 2nd Thursdays at 1 pm eastern (12 pm central, 11 am mountain, 10 am pacific, 9 am Alaska, 8 am Hawaii)
 - Examples are April 13, May 11

If you do not wish to be included, please let me know. We are requesting responses by COB 3/2/23 (Friday).

All the best,

Hi Erica,

I wanted to follow up and see if you may have time for a call sometime in the next few weeks to continue our conversation ((b) (6) is out this week). It looks like after 1-3pm on the 23rd could work well for us, or Monday, February 28 from noon – 3pm, or Tuesday, March 1 most of that day.

Let us know if any of those times may work for you.

Best,

(b) (6)

Subject: Re: [EXTERNAL] - Potential EAGER Proposal

Hi (b) (6)

(b) (4)

EAGERs require invitations to submit, so the next step would be either to meet again, or for you to send me a 'one pager' prospectus, including discussion of how the proposed activity meets EAGER criteria—i.e., you'll need to make the argument that something you're proposing is new or untested or novel, and therefore risky.

For examples from past NSF EAGERs, search "EAGER" here:

<https://www.nsf.gov/awardsearch/simpleSearch.jsp>

You might want to take a look at this link for other funding opportunities that explicitly mention hazards:

https://beta.nsf.gov/funding/opportunities?search_api_fulltext=hazard&sort_bef_combine=search_api_relevance_DESC

****External Sender****

Hi (b) (6) I'm on my way out the door on some travel, so here are some quick responses.

Re: Logistics: general rule of thumb is to plan one year ahead, so no, I do not expect you would be able to get logistics support for summer 2023 with a fall/winter 2022 proposal submission. It is unlikely we will have a final decision for you by January 2023. A quick external review takes a

minimum of three months, and more likely is four to five months. I advise against planning on external logistics support for summer 2023.

(b) (4)

Ethics board members—if they are not senior personnel, then no biosketches are needed. It's a good plan to have them submit letters of collaboration, as you indicate. I also recommend discussing their contributions in the project narrative.

The personnel you outline in your email sound like a very impressive group. The key issue is to have an ethicist on board, which it sounds like you do. The position in the ethics program at NSF is currently being filled, so there isn't anyone available to meet with just now.

I'm back in the office Sept 19, and we can check in sometime after that, if you'd like. I'm also planning to attend Arctic Circle in Reykjavik in October, and would love to meet up with any of your team members who will be there.

Take care,
Erica

Subject: [EXTERNAL] - questions regarding (b) (4) proposal

This email originated from outside of the National Science Foundation. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hi Erica ...

(b) (6) n, and I have been working with our project development and grants specialist (b) (6) on our (b) (4) proposal. There are a few questions we need assistance with.

- We are anticipating submitting our proposal the end of October 2022, very first part of November 2022 instead of our original plan which was early September 2022. (b) (4)

(b) (4)

(b) (4)

Given this above information, what are your thoughts about how realistic it is to have a decision from NSF about our proposal by January 2023? And if you think that we would receive notice about whether or not we were funded later than January 2023 given a late October 2022/early November 2022 submission, when do you think we could expect to hear about a decision? Any thought you can give us on this would be helpful so that we can work with PFS in planning our logistics.

- (b) (4)
 - Can you please advise us on what kind of information is needed for the members of our Ethics Advisory Board? They are not considered key personnel. Do we need biosketches from them? Or some kind of other documentation about their expertise. We will receive letters of commitment from them to submit with the proposal.
 - (b) (4), (b) (6)
- At this point, in our revisions to our proposal, we have addressed the

concerns about (b) (4), (b) (6)

Hi Allen,

Thanks for this idea! I had a chance to discuss this with some of the project partners last week, and we think it would be very productive to hold a workshop. I think that this would also be quite synergistic with some other (b) (4) that we've been launching this year.

I know that your budgeting situation remains a bit fluid, but what would be the best avenue forward for us to request funding for such a workshop? Is there something that we could put together for you that would allow you to consider inviting us to submit for an EAGER, or perhaps some other funding source? Happy to pester you again with this question after the 3rd, if that would be better! Thanks again.

Cheers,

(b) (6)

Hi (b) (6),

My apologies for the VERY long delay in reply. As you will likely be familiar, we started a new fiscal year but are also on a CR so don't have our full budgets in hand – and we still don't know exactly what will be happening after Dec 3. All that to say, some things are unclear / moving a bit slow at NSF but hopefully clearing up and picking up again soon. But again, I do apologize of the delay. Please do feel free to nudge for a reminder in the future, too!!

Erica and I did have a chat, and we wonder whether, given the concerns, a workshop or planning activity of some kind which pulled together partners (like QDR, ADC, ELOKA and Indigenous scholars working on data issue) might be a good first step? Some of the materials from the recent Navigating the New Arctic Community Office meeting might be of interest in that regard. Your ideas have merit, but developing deeper Arctic collaborations and being able to situate them within the existing Arctic Indigenous and social science data discussions is important before moving forward.

All the best,
Allen

Hi Allen,

No problem at all on the delayed reply, we just appreciate that you were able to take the time to engage with us! Both of your suggestions are very well taken. (b) (4), (b) (6)

(b) (6)

We wanted to make sure that the idea was a reasonable fit for NSF before asking him to commit to further co-development of the idea with us. We also have several other Indigenous organizations in mind, either as core partners or for scaling out the project in later years.

We also agree that Indigenous data are relevant beyond the social sciences. (b) (4)

(b) (6)

If we do want to further develop these ideas, with your suggestions in mind, what would you suggest as our next steps? We were originally imagining that a proposal along these lines might make the most sense within the Arctic Social Science Program. Can you or Dr. Hill advise on fit with that program or suggest a better option for our project in relation to the DCL? Thanks!

Best,
(b) (6)

Hi (b) (6)

Thank you so much for your patience - my apologies again for the delayed reply. Erica and I did have a chat a little while ago – so my bad, not hers!

Thank you for reaching out with this interesting idea. It's great to see momentum and building off of the work ongoing and conversations started by the Arctic Data Center.

I'm not super-familiar with the (b) (4) but on the surface, I would suggest that for a proposal with the intent to help support Arctic Indigenous data, it would be pretty important for that proposal to be crafted with at least some Arctic Indigenous organizations / leads / participants. Co-creative approaches are important to start from the get-go, and taking a step back to meaningfully engage with such partners would likely be important for collaborative success.

Also (and I write this as a glaciologist), as I'm sure you're aware, Indigenous data isn't necessarily / just social science related, and I think it would be important for any proposal addressing that topic to be relevant for other disciplinary and systems areas.

I hope these thoughts are helpful – but please do let me know if you have further inquiries and questions. I'll be better about replying faster!

Best,
Allen

Hi (b) (6) (and cc'ing Erica – sorry I accidentally left you off there!),

I think the best mechanism for a workshop would be to use the “Conference Proposal” mechanism. You can read more about it here: https://www.nsf.gov/pubs/policydocs/pappg22_1/pappg_2.jsp#IIE, and conference proposals are able to be submitted to the Arctic Research Opportunities solicitation - <https://www.nsf.gov/pubs/2021/nsf21526/nsf21526.htm>

Basically, up to \$50,000 to bring people together, in this case with a defined outcome. These relative small proposals are generally good for community building, and they also enable us to also streamline the review process.

I'd suggest bringing together a team and reframing a one-pager about an event / expected participants / expected outcomes, and then send it back for discussion. (Erica – does that sound good to you?)

Best,
Allen

Dear Allen and Erica,

I wanted to follow up with you regarding our previous email (below) about the 'Supporting Data and Sample Reuse in Polar Research' Dear Colleague Letter, to make sure that it made it through. We are very much looking forward to discussing the idea with you, if it fits with the vision you have for the program. Thanks so very much!

Best,

Hi Erica,

Here's what I've come up with so far. A few minor changes here and there (e.g., "workshops" to "workshop"), and then the main addition starting on p. 6 with a description of what we expect before, during, and after the workshop. If this is heading in a promising direction, great, and we can discuss what more is needed and what can be cut to keep us within the 8-page limit for a planning proposal. If this is NOT heading anywhere helpful, then we can talk about that, too, and whether a workshop proposal is a better idea. Thank you again, and I look forward to talking on Monday!

Best wishes,

(b) (6)

On Fri, Jul 15, 2022 at 9:32 AM (b) (6) wrote:

Thanks, Erica! I'll get you something today so you can read it Monday morning before we talk.

You didn't imply anything would be easy, and I think I have enough experience with NSF to know it never is! I'd say it's more the case that we have no experience with the "planning" category, so weren't too sure what we were aiming for or who we needed to persuade and how. So we very much appreciate your guidance and patience. And perhaps our emphasis on a "workshop" is also implying something about our approach that minimizes the other work we expect to be needed for planning and preparing a proposal. That said, we're also open to anything that can help us move ahead, so I look forward to discussing options with you on Monday!

Best wishes,

(b) (6)

On Fri, Jul 15, 2022 at 8:17 AM Hill, Erica <erhill@nsf.gov> wrote:

Just sent a zoom invite for Monday. If you can get me something to read by Monday morning (East Coast time), then I can have some feedback for you when we meet. I'm sorry if I haven't been clear about expectations, or if I implied this would be a slam dunk.

Take care,
Erica

Hi Erica,

Thanks for the extra context, that's a big help. How about Monday at 2 pm EDT? (b) (6)

I have spent some time trying to add some more details about the workshop (singular, since we're thinking of a one-year effort now). Are you able to look at revisions in progress on a proposal, or is that crossing a line? If not, I can tell you what I've been doing when we chat on Monday.

Many thanks for helping us figure out how to make this happen, one way or another!

Best wishes,

(b) (6)

On Fri, Jul 15, 2022 at 8:02 AM Hill, Erica <erhill@nsf.gov> wrote:

Hi (b) (6)

It might make sense to chat about this on zoom. (b) (4)

(b) (4)

If all you're doing is a workshop, then a planning proposal isn't even the right mechanism—it should be a workshop proposal for \$50K. Again, a planning proposal is “used to support initial conceptualization, planning and collaboration activities that aim to formulate new and sound plans for large-scale projects in emerging research areas for future submission to an NSF program.”

Let's meet and discuss—I ***do*** want to support work on this topic, but right now I'm getting the sense that we still haven't hit on the right funding mechanism. I have time next week, and can do just about any time on Tuesday afternoon (i.e., East Coast afternoon). Monday and Tuesday are also possible—I could do 2PM or 4PM on Monday, or anytime from noon to 2 PM (Eastern) on Wednesday. I'm then going on a research trip to Newfoundland, so will be largely off the grid until August 4.

Best wishes,
Erica

Many thanks, Erica!

Just to be clear about what we need to do by then:

1. Change the budget to <\$100K, which will probably be just a one-year project (i.e., we'll largely use our Year 1 budget and just scrap the Year 2 costs)
2. Give a little more detail about what the workshop (now singular) will accomplish and what we will be using our time for

(b) (4)

Best wishes,

(b) (6)

On Wed, Jul 13, 2022 at 12:14 PM Hill, Erica <erhill@nsf.gov> wrote:

Hi again (b) (6)

I don't want to pester you, but I did want to let you know that there is the potential to fund your (b) (4) but only if you move quickly on a plan of work and revised budget and budget justification. This is not to pressure you—starting October 1 I will have a new budget for FY23. But if you do have the time and inclination to move forward with this project within the next three weeks, funding this year **is** a possibility.

The absolute last day that I can recommend a project for this fiscal year is August 8th—so I would need to have everything in hand within the next couple of weeks to make that happen (including the budget and budget justification submitted through UAF's Sponsored Programs).

If this isn't do-able, that's fine—I just wanted to give you the option. Could you let

me know whether you have a strong inclination one way or the other?

Thanks,
Erica

This email originated from outside of the National Science Foundation. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Erica,

Please discard the previous message. We have been able to receive continued IRB oversight through the University of Alaska Anchorage.

It was a little confusing for us to determine if an IRB is still needed for the project. Regardless, everyone within ICC felt more comfortable ensuring that we did have the IRB in place through the completion of the work under the NSF award.

I hope you are well.

Thank you,

Carolina

On Fri, Apr 22, 2022 at 1:50 PM Carolina Behe <carolina@iccalaska.org> wrote:

Hi Erica,

I hope you are doing great!

We are in the final stages of our grant. We will be working on a policy paper through the next month with members of the Advisory Committee and a few others. The bulk of the remaining Participant Support in our grant is intended to support their contributions to the paper and possibly bring them together to meet in person.

Today we received news from UAA that they will no longer be able to provide oversight to our grant due to a lack of affiliation with UAA. ^{(b) (6)}

. However, the IRB office has indicated that they cannot recognize the status. While we are trying to work this out with the UAA office, I am concerned that we may be left without an IRB as of May 7th.

Our NSF grant is scheduled to end in October of this year. And we would like to complete

this last task. However, getting a new IRB for the remaining work seems extensive.

I am hoping you may have some advice or guidance for us. Do you have time for a brief call on Monday and/or some quick advice?

Thank you!
Carolina

Hi Carolina,

Yes, it's permissible to use funds to hire consultants (or other organizations) to do specific types of work (similar to how ICC may have hired someone outside ICC to do the report design and layout). If it's work for hire (i.e., as a consultant), then the funds must be obligated by ICC before the end-date of the award. ICC is still permitted to pay outstanding invoices in the 90 days after the award ends, as long as those funds were obligated before the end date.

I'll be on the lookout for the request to shift participant support funds.

Thank you Erica!

Yes, we will take money out of participant support. I will submit the formal request.

One question I have is about the possibility of providing funding to another organization to do the translation of the summary and for the work to be out of ICC AK's hands. Meaning, we would close the grant with the understanding that the organization is completing the work.

If this is okay, the organizations would be an Inuit organization in the ISR and one here in Alaska.

Please let me know what you think.

Thank you!

This email originated from outside of the National Science Foundation. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hi Erica!

I hope that you are doing great!

Working with our Partners and Advisory committee we have decided that we would like to try to use the remaining funding to translate the FSSG Summary and Recommendations report (see attached) into Inuit dialects.

We are still working on confirming that there are people available to do this work and that the graphic designers will be ready.

We will also use funding for additional printing of materials and border distributions. This is in addition to the Participant Support that will remain to support a group of authors that are working on the policy paper.

I am hoping that this will all come together in the next month.

I also wanted to let you know that I have made the difficult decision to leave ICC and I have accepted a position with the NOAA Marine Sanctuaries Office. My last day with ICC will be Sept. 11th (last day in office will be Sept. 1st).

In speaking with NOAA, they have indicated that it is fine for me to stay on as a PI to this project as long as I do not communicate with NOAA regarding the budget. We hope to have all of the funding out within August. And then my boss would do the final draw downs.

Please let me know if you have some time to talk during the last week of July. Next week we have the ICC General Assembly! Which is very exciting.

Thank you!

Subject: Indigenous Knowledge Guidance Release

Good morning, IWG-ITEK,

It's a big day. **Today, we will formally release Guidance for Federal Departments and Agencies on Indigenous Knowledge!**

As you might have seen yesterday, President Biden previewed the value of Indigenous Knowledge in Federal Decisionmaking in [his Tribal Nations Summit speech](#) and the Guidance is featured in the [White House Factsheet for the Summit](#).

The Guidance release event today is a Fireside Chat at the White House Tribal Nations Summit between Chairman Mike Wiggins of the Bad River Band of Lake Superior Ojibwe Tribe, OSTP Director Arati Prabhakar and CEQ Chair Mallory, slated to start at 1:45 pm today. Livestream should become available [here](#).

As you will see in the release materials, we will be continuing this working group and formalizing it under the National Science and Technology Council as the Subcommittee on Indigenous Knowledge. This is a great step for institutionalization of this group and carrying on this important work across the government. More details to share at our Monday meeting. I will follow-up with links to everything when available.

Congratulations, everyone! This would not have been possible without the expertise, time, and collaboration of all of you! I'm so proud of this work we did together.

Hi Erica,

Thank you. We reviewed the local context labels in our workshop a while back, and when we started working on our sensitive data classification project last year. So we are quite familiar with the effort, which I think has a lot of utility. Ultimately, we decided to go with the much simpler DataTags classification, but I think they could both be useful in different ways. Do you know of any repositories that have implemented the local contexts classification? I had a hard time finding it in real-world usage, and would love to see some examples.

Subject: Indigenous Youth Gathering

Good morning, Erica,

I met with the (b) (6) this morning to walk through the questions you sent, as well as to kick off the project planning.

It has become clear that to provide the best quality experience for the invited participants and meet the goals of creating an event that converges sustainability science and Indigenous knowledge systems, (b) (4)

This will allow for the culturally centered approach to sustainability that we have discussed; it would also allow us to create a more sustainable program that would not be simply a one off, but one that could grow and better support Indigenous engagement in sustainability science. This would extend the timing of the grant proposal. I think, in the end this change will create a much better "product" aligned with NSF goals. I would like to discuss this with you as soon as possible as it does have budgetary impacts, but I think we can make this plan work.

I so appreciate your support for this project. I would not suggest a pivot unless I thought it was necessary to achieve the goals we have set out together.

Dear Erica,

I'm glad my musings were worth the wait (and sorry again for the wait). Thank you also for the welcome for environmental history applications to your NSF program. That's really exciting. I'd love to think more about this and perhaps find a time to talk more about it. I'll be honest, I've been thinking for a few years about applying to the NSF for support but am less familiar than I should be with the different options, programs, and procedures. Perhaps we might find a time for a chat over the summer?

With thanks, and wishing you all the best,

Hi Erica,

Of course, I can do that and then we can schedule a meeting. I will let you know after I've had a chance to read and digest.

Thanks again,

(b) (6)

Hi (b) (6)

Glad you're not discouraged—let's wait until after you've had a chance to review all the comments, which will become available to you once the official decline notification goes out. That should be later this week.

Take care,
Erica

Dear Erica,

Thank you for your thoughtful message. While I am of course disappointed, I am happy to hear that my proposal has promise. That was more than I had hoped for during this first try.

I would very much appreciate a Zoom meeting to hear your suggestions and thoughts on reviewers' comments. My schedule is very flexible after 11am EST most days. I'm happy to put together a Zoom like for a time that works for you.

My best,

(b) (6)

Subject: Update on NSF proposal

(b) (4)

Dear (b) (6)

I'm writing to update you on the status of your CAREER proposal. I regret that NSF will be declining the proposal. However, I don't want you to be discouraged—the review process is rigorous, and it clearly shows that your project has significant intellectual merit—a key NSF criterion.

Your project was reviewed by both Arctic Social Science and by a panel organized by the Archaeology Program. (b) (4)

You'll get access to all of the reviewer comments, as well as my own assessment, once the decline is formally processed. After you've had a chance to consider the comments, please get in touch to discuss revision. I know this is discouraging, but I think you've got the makings of a fundable proposal.

I'm happy to schedule a zoom when you're ready to chat.

Take care,
Erica

Hi (b) (6)

Sorry you haven't received the official notice yet—things are a bit behind, so I'm attaching the reviews here. There are two files—one is the individual reviews, and the second is the panel summary. The proposal was evaluated both ways—by individual reviewers selected by me and by John Yellen, and then also considered by the Archaeology panel. This may seem like double jeopardy, but it's really not. We can discuss in greater detail after you've had a chance to consider the reviews.

Take care, and talk to you soon,
Erica

Hi (b) (6) I've received the form, and need to check on whether I can actually sign it.

The form has the line "guest acknowledges relationship with the university as an 'independent contractor.'" I am explicitly prohibited from any contracting relationship with a university whose awards I administer (it creates a conflict of interest). I currently administer awards to (b) (6) and (b) (6), so I technically cannot accept any kind of contract with (b) (4) or I have to stop administering all (b) (4) awards.

Can you double check that this form is actually needed? If it is, then I'll have to get it reviewed by NSF's ethics officer first.

Thanks,
Erica

Dear (b) (6),

Thank you both for the plan for my visit.

Yes, I am happy to meet with folks for breakfast or for dinner on Feb 22—probably not both, but one or the other would be fine! These types of visits are fun to do, but also exhausting, so I appreciate you working in some 'down' time for me.

Here are suggested titles and summaries. Please feel free to edit/modify as needed. I went with straightforward descriptive titles, but if you'd prefer to be more creative, that's fine, too.

For faculty: Social Science Research Opportunities at NSF

This presentation provides a general overview of current funding opportunities for social science research at NSF, followed by time for questions and answers. The speaker will briefly discuss the organization of NSF programs, current solicitations, and the review process, then provide tips on addressing the two NSF Merit Review Criteria, which are Intellectual Merit and Broader Impacts. The presentation will then shift to opportunities from the Arctic Sciences Section, and outline some research areas the Section is especially interested in supporting, including Arctic security, Indigenous knowledge, and sustainable livelihoods.

For PhD students and post-docs: Early Career Research Opportunities at NSF

This presentation provides an introduction to NSF opportunities for PhD students and early career researchers, followed by time for questions and answers. Participants will learn about NSF support for dissertation research and post-doctoral fellowship programs in the Social Sciences as well as how the review process works. The last fifteen minutes will focus on opportunities from the Arctic Social Sciences program, including support for early career researchers new to Alaska and the Arctic.

Bio (feel free to edit as needed): Erica Hill (Ph.D., University of New Mexico) is an anthropological archaeologist and Arctic researcher who has worked in Alaska, Iceland, Russia, and Latin America. She joined NSF in 2020 from the University of Alaska Southeast, and currently manages the Arctic Social Sciences Program in the Arctic Sciences Section. Erica's brings to the program broad training in anthropology, interest in research ethics, and previous work on human-animal interactions, subsistence practices, and material culture. She was a Fulbright-NSF Arctic Scholar to Iceland, and is currently working on an edited volume on humans and animals across the Arctic.

Cc: (b) (6)
Subject: visiting (b) (4)

Dear Erica,

Thank you again for agreeing to come up to visit (b) (4) on February 22-23. We very much look forward to it.

We are preparing an itinerary for your visit and a description of your talks to announce internally and externally. We suggest that you give one talk on each of the two days. One talk would be on NSF social science in general and then Arctic social science. The audience would be faculty/researchers. The other is for postdocs and PhD students. Each talk would be scheduled at lunch time and last 1.5 hours. You would give a 45 minutes talk each, followed by Q&As. It will be in a hybrid format, so that we could broadcast your talk to as many people (including outside of (b) (4)) as possible.

Your individual meetings would start at mid-morning, and ends half an hour before

your talk starts. The afternoons would also be for individual meetings, each 30 minutes. The individual meetings would end by 5pm, and we can end it earlier on 2/23 if you depart on that day. We will have dinners with you on all the nights when you are here.

We have a few questions at this stage.

1. What do you think our initial ideas of your visit? Do you have any preference that we could consider? Would you prefer to have breakfast by yourself? The Hyatt has continental breakfast. We would be very happy to schedule you to have breakfast with (b) (4) folks, but thought you might like some "lighter" time. I am copying (b) (6) on this email. She is assisting us with your visit and logistics. She might have additional questions for you.

2. To maximize the benefits of your visit, we think that it would attract more audience and make a bigger impact if you could talk about NSF social science in general, in addition to Arctic social science. Perhaps half on each topic? Would that be OK with you?

3. Could you please send us your bio, a headshot photo, and titles and short descriptions of the two talks? We will use that to announce your visit.

Please let us know your preference or if you have any questions. Thank you.

Sincerely,

(b) (6)

Dear Erica,

Thank you again for agreeing to come up to visit (b) (4) on February 22-23. We very much look forward to it.

We are preparing an itinerary for your visit and a description of your talks to announce internally and externally. We suggest that you give one talk on each of the two days. One talk would be on NSF social science in general and then Arctic social science. The audience would be faculty/researchers. The other is for postdocs and PhD students. Each talk would be scheduled at lunch time and last 1.5 hours. You would give a 45 minutes talk each, followed by Q&As. It will be in a hybrid format, so that we could broadcast your talk to as many people (including outside of (b) (4)) as possible.

Your individual meetings would start at mid-morning, and ends half an hour before your talk starts. The afternoons would also be for individual meetings, each 30 minutes. The individual meetings would end by 5pm, and we can end it earlier on 2/23 if you depart on that day. We will have dinners with you on all the nights when

you are here.

We have a few questions at this stage.

1. What do you think our initial ideas of your visit? Do you have any preference that we could consider? Would you prefer to have breakfast by yourself? The Hyatt has continental breakfast. We would be very happy to schedule you to have breakfast with (b) (4) folks, but thought you might like some "lighter" time. I am copying (b) (6) on this email. She is assisting us with your visit and logistics. She might have additional questions for you.

2. To maximize the benefits of your visit, we think that it would attract more audience and make a bigger impact if you could talk about NSF social science in general, in addition to Arctic social science. Perhaps half on each topic? Would that be OK with you?

3. Could you please send us your bio, a headshot photo, and titles and short descriptions of the two talks? We will use that to announce your visit.

Please let us know your preference or if you have any questions. Thank you.

Sincerely,

(b) (6)

Dear (b) (6)

This looks great. Thanks so much for all the hard work, and for giving me a bit of breathing room in between—much appreciated!

No problem serving a lunch while I talk. I'm just glad there will be food on offer—always good for encouraging attendance!

Thanks again,
Erica

Hi Erica,

Thank you for the information pertaining to your visit and food preferences, I greatly appreciate it. I am attaching the updated itinerary for your review, if anything needs to be changed, please let me know.

Regarding your presentation for the Post Doctorate and PhD attendees, would you prefer a boxed lunch be served after or is it acceptable to offer a lunch during your talk? We plan to offer a lunch to the attendees as a thank you, but do not want to disrupt your presentation.

-Thank you

Dear (b) (6),

Thank you for your email. NSF will be covering all of the costs of my visit, and I must pay for all of my own meals at restaurants. I am allowed to accept a sandwich or coffee when they are provided to all participants in an event—for example at a workshop. But if I go out to a restaurant, I need to pay for my own meal if at all possible, even when all the other participants have their meals covered.

(b) (6)

Thank you again,
Erica

Good Morning Dr. Hill,

I hope you are doing well and have had a pleasant holiday. To ensure we have everything promptly arranged for your visit, would you please advise me if NSF will be covering your expenses or if we will. There are a few forms that I need to have you sign and fill out before your visit and this information would be most helpful in getting those processed. Additionally, regarding the dinner with (b) (6) and a few other guests, were there any dietary preferences or allergies you would like us to take in account when looking at a restaurant?

-Thank you for your time,

Dear (b) (6)

Thank you both for the plan for my visit.

Yes, I am happy to meet with folks for breakfast or for dinner on Feb 22—probably not both, but one or the other would be fine! These types of visits are fun to do, but also exhausting, so I appreciate you working in some 'down' time for me.

Here are suggested titles and summaries. Please feel free to edit/modify as needed. I went with straightforward descriptive titles, but if you'd prefer to be more creative, that's fine, too.

For faculty: Social Science Research Opportunities at NSF

This presentation provides a general overview of current funding opportunities for social science research at NSF, followed by time for questions and answers. The speaker will briefly discuss the

organization of NSF programs, current solicitations, and the review process, then provide tips on addressing the two NSF Merit Review Criteria, which are Intellectual Merit and Broader Impacts. The presentation will then shift to opportunities from the Arctic Sciences Section, and outline some research areas the Section is especially interested in supporting, including Arctic security, Indigenous knowledge, and sustainable livelihoods.

For PhD students and post-docs: Early Career Research Opportunities at NSF

This presentation provides an introduction to NSF opportunities for PhD students and early career researchers, followed by time for questions and answers. Participants will learn about NSF support for dissertation research and post-doctoral fellowship programs in the Social Sciences as well as how the review process works. The last fifteen minutes will focus on opportunities from the Arctic Social Sciences program, including support for early career researchers new to Alaska and the Arctic.

Bio (feel free to edit as needed): Erica Hill (Ph.D., University of New Mexico) is an anthropological archaeologist and Arctic researcher who has worked in Alaska, Iceland, Russia, and Latin America. She joined NSF in 2020 from the University of Alaska Southeast, and currently manages the Arctic Social Sciences Program in the Arctic Sciences Section. Erica's brings to the program broad training in anthropology, interest in research ethics, and previous work on human-animal interactions, subsistence practices, and material culture. She was a Fulbright-NSF Arctic Scholar to Iceland, and is currently working on an edited volume on humans and animals across the Arctic.

Hi Erica,

I appreciate the information and apologize for my late response; I received confirmation that we do not need that form for your visit and can continue without it. Since we do not need that form, I would like to confirm some items with you to ensure they are allowable with NSF presentations.

Are we able to take pictures during your presentations?

Are we allowed to record the presentations?

The presentations will be in-person and on zoom, are there any handouts you would like to have given out?

Will you be bringing a computer or a thumb drive to connect to the projector for your presentations?

-Thank you for your time,

Hi (b) (6)

I just checked, and I am ***not*** able to sign this form. Creating a contractor relationship with (b) (4) (b) (4) would prevent me from handling any current or future (b) (4) proposals and awards.

I am happy to explain this further, but NSF is ***very*** strict on conflicts of interest.

I ***can*** agree not to sell merchandise :)

And I can attest to my citizenship and residency, though I think all of that is relevant only if I'm getting paid.

Best wishes,
Erica

To: (b) (6)
Subject: Re: [EXTERNAL] - Re: visiting (b) (4)

H (b) (6) I've received the form, and need to check on whether I can actually sign it.

The form has the line "guest acknowledges relationship with the university as an 'independent contractor.'" I am explicitly prohibited from any contracting relationship with a university whose awards I administer (it creates a conflict of interest). I currently administer awards to (b) (6) and (b) (6), so I technically cannot accept any kind of contract with (b) (4) or I have to stop administering all (b) (4) awards.

Can you double check that this form is actually needed? If it is, then I'll have to get it reviewed by NSF's ethics officer first.

Thanks,
Erica

We have a few questions at this stage.

1. What do you think our initial ideas of your visit? Do you have any preference that we could consider? Would you prefer to have breakfast by yourself? The Hyatt has continental breakfast. We would be very happy to schedule you to have breakfast with (b) (4) folks, but thought you might like some "lighter" time. I am copying (b) (6)

(b) (6) on this email. She is assisting us with your visit and logistics. She might have additional questions for you.

2. To maximize the benefits of your visit, we think that it would attract more audience and make a bigger impact if you could talk about NSF social science in general, in addition to Arctic social science. Perhaps half on each topic? Would that be OK with you?

3. Could you please send us your bio, a headshot photo, and titles and short descriptions of the two talks? We will use that to announce your visit.

Please let us know your preference or if you have any questions. Thank you.

Sincerely,

(b) (6)

Dear (b) (6)

Thank you both for the plan for my visit.

Yes, I am happy to meet with folks for breakfast or for dinner on Feb 22—probably not both, but one or the other would be fine! These types of visits are fun to do, but also exhausting, so I appreciate you working in some ‘down’ time for me.

Here are suggested titles and summaries. Please feel free to edit/modify as needed. I went with straightforward descriptive titles, but if you’d prefer to be more creative, that’s fine, too.

For faculty: Social Science Research Opportunities at NSF

This presentation provides a general overview of current funding opportunities for social science research at NSF, followed by time for questions and answers. The speaker will briefly discuss the organization of NSF programs, current solicitations, and the review process, then provide tips on addressing the two NSF Merit Review Criteria, which are Intellectual Merit and Broader Impacts. The presentation will then shift to opportunities from the Arctic Sciences Section, and outline some research areas the Section is especially interested in supporting, including Arctic security, Indigenous knowledge, and sustainable livelihoods.

For PhD students and post-docs: Early Career Research Opportunities at NSF

This presentation provides an introduction to NSF opportunities for PhD students and early career researchers, followed by time for questions and answers. Participants will learn about NSF support for dissertation research and post-doctoral fellowship programs in the Social Sciences as well as how the review process works. The last fifteen minutes will focus on opportunities from the Arctic Social Sciences program, including support for early career researchers new to Alaska and the Arctic.

Bio (feel free to edit as needed): Erica Hill (Ph.D., University of New Mexico) is an anthropological archaeologist and Arctic researcher who has worked in Alaska, Iceland, Russia, and Latin America. She joined NSF in 2020 from the University of Alaska Southeast, and currently manages the Arctic Social Sciences Program in the Arctic Sciences Section. Erica's brings to the program broad training in anthropology, interest in research ethics, and previous work on human-animal interactions, subsistence practices, and material culture. She was a Fulbright-NSF Arctic Scholar to Iceland, and is currently working on an edited volume on humans and animals across the Arctic.

Good Afternoon Ms. Erica,

I am excited to help facilitate your visit to (b) (4) and would like to take a moment to send you the draft itinerary that we have created. Please let me know if anything should be changed or altered to better fit your schedule. Please have a pleasant weekend.

-Thank you,

Cc: (b) (6)
Subject: visiting (b) (4)

Dear Erica,

Thank you again for agreeing to come up to visit (b) (4) on February 22-23. We very much look forward to it.

We are preparing an itinerary for your visit and a description of your talks to announce internally and externally. We suggest that you give one talk on each of the two days. One talk would be on NSF social science in general and then Arctic social science. The audience would be faculty/researchers. The other is for postdocs and PhD students. Each talk would be scheduled at lunch time and last 1.5 hours. You would give a 45 minutes talk each, followed by Q&As. It will be in a hybrid format, so that we could broadcast your talk to as many people (including outside of (b) (4)) as possible.

Your individual meetings would start at mid-morning, and ends half an hour before your talk starts. The afternoons would also be for individual meetings, each 30 minutes. The individual meetings would end by 5pm, and we can end it earlier on 2/23 if you depart on that day. We will have dinners with you on all the nights when you are here.

We have a few questions at this stage.

1. What do you think our initial ideas of your visit? Do you have any preference that we could consider? Would you prefer to have breakfast by yourself? The Hyatt has continental breakfast. We would be very happy to schedule you to have breakfast with (b) (4) folks, but thought you might like some "lighter" time. I am copying (b) (6) on this email. She is assisting us with your visit and logistics. She might have additional questions for you.

2. To maximize the benefits of your visit, we think that it would attract more audience and make a bigger impact if you could talk about NSF social science in general, in addition to Arctic social science. Perhaps half on each topic? Would that be OK with

you?

3. Could you please send us your bio, a headshot photo, and titles and short descriptions of the two talks? We will use that to announce your visit.

Please let us know your preference or if you have any questions. Thank you.

Sincerely,

(b) (6)

Hi Erica!

Thank you for your quick reply!

Yay for the EEE Protocols! We will have a hard copy sent to you as soon as they are printed. I am very excited that they have come out.

I was hoping to talk to you before I come to the office. Would it be possible to meet at 7am AKT; 11am ET on Monday or Tuesday? If not, I completely understand and will be able to do 2pm ET on Tuesday.

Thank you!

Some of you have already seen this article, sorry for the cross-sharing. Sharing it with the NSTC subgroups on co-production/co-stewardship and research not only because it is led by an Indigenous scholar, but because I feel it also is an example that includes Indigenous knowledge holders in the lit cited. And instead of citing traditional arctic science academics only and perpetuating those sources as *the* credible sources, it includes IK holders and Indigenous sources as the primary sources. I've seen some social equity and justice themed journal articles recently that I was kind of surprised they

included many/mostly academic and non-Indigenous scholarship. An important part of centering IK is also recognizing and valuing primary sources and the Indigenous scholars (like Kaare) who occupy this difficult/tricky space.

This email has been received from outside of DOI - Use caution before clicking on links, opening attachments, or responding.

Hi, everyone! Thank you for participating in the Doodle poll to decide our next meeting. However, in the meantime, we all saw the reminder from (b) (6) and (b) (6) that the draft report is due on Friday, which has upended our plans a bit. (b) (6) and Erica heroically leaped into the pile of recommendations we've collected, and completed an amazing, truly breathtaking, draft report, including appendices and references to pending or finalized federal policies or legislation.

So here's what we are proposing instead: Can you please read and provide back by COB tomorrow (Thursday, May 19) your thoughts/edits/additions to the attached document, putting those suggestions into track changes? Please send to (b) (6) and Erica (erhill@nsf.gov), who plan to finalize the draft and send it in to (b) (6) on behalf of ITEK SG3.

Please send any questions on the process! And please forward to anyone who has been added to SG3 but is inadvertently omitted from this message.

With all my best wishes and thanks,
Jody

Hi Jody, Erica, (b) (6)

In another interagency workgroup implementing the Tribal Treaty Rights MOU, we're proposing to incorporate the following paragraph in a best practices document for tribal consultation (as it relates to treaty rights). We want to make sure this language is consistent with what is being said in the Traditional Indigenous Knowledge guidance.

Here is the current draft language:

(b) (5) - Deliberative Process

Please let me know if you have any comments or concerns.

Thanks, y'all! I will do that as soon as this panel is over—the meeting hosts just pushed the timeline back 15 minutes. It's a conference on language, put on by the Mica—Group or Foundation, not sure which, and they have a panel of “funders” (smile)! So NSF has a small set of progoffs to speak to them about NSF support for linguistics. Jody
