# Community Violence (CV) Definition

- Community violence (CV) includes violence in public spaces (e.g., streets, parks), and may not be limited to youth.
- Examples include violence among youth and non-youth.
- Youth and non-youth are at greatest risk.
- Youth and non-youth with racial and ethnic minority backgrounds experience higher rates of community violence.

**Subject:** Invitation to Review New Community Violence Prevention Resource for Action

Good afternoon,

On behalf of the Centers for Disease Control and Prevention's Division of Violence Prevention (DVP), we invite you to review a draft of CDC's forthcoming **Community Violence Prevention Resource for Action: A Compilation of the Best Available Evidence for Youth and Young Adults**.

If you are interested in reviewing the draft, which is about 60 pages, please let us know by end-of-day **Thursday, June 15th**. Below is a brief outline of what the review process will entail, including more information about the prevention resource for action:

- DVP will provide an overview of the Community Violence Prevent Resource for Action via a partner webinar, which is planned for **Tuesday June 20<sup>th</sup> 1-2pm ET**. We will send out more information at a later time.
- Immediately following the webinar, we will send the draft resource out for comments which will be due to Samantha McKeithan, [ypl0@cdc.gov](mailto:ypl0@cdc.gov) by **Tuesday July 11<sup>th</sup>**.
- Notes regarding the review process:
  - We ask that reviewers do not forward the draft document beyond the review group.
  - We won't be able to accept tracked changes or comments within the body of the PDF draft and ask that reviewers please provide their comments in a separate document.
  - If more than one individual from an organization will be commenting, we ask for all comments to be combined into one response per organization.
  - If you need more time to submit comments, please contact Samantha McKeithan at [ypl0@cdc.gov](mailto:ypl0@cdc.gov).

**The Community Violence Prevention Resource for Action: A Compilation of the Best Available Evidence for Youth and Young Adults** updates and expands on the 2016, [\*Comprehensive Technical Package for the Prevention of Youth Violence and Associated Risk Behaviors\*](#), one of a suite of violence prevention resources developed by DVP over the past several years to help communities make use of the best available evidence. Previously, these resources were called "technical packages" but are now referred to as "prevention resources." The **Community Violence Prevention Resource for Action** includes a select group of strategies based on the best available evidence to help communities and states sharpen their focus on approaches with the greatest potential to reduce community violence (including the most serious forms of violence) and inequities in risk for violence. We used the following definition and information to guide development of the new **Community Violence Prevention Resource for Action**:

*"Community violence (CV) happens in public places (e.g., streets, schools, parks), between people who may or may not know each other. Examples include assaults, fights among groups, homicides, and fatal and nonfatal shootings. Youth and young adults (ages 10-34), are at greatest risk of CV, with youth and young adults from many racial and ethnic minority groups experiencing inequities in risk for CV."*

Here's a high-level overview of what that includes:

- We center communities, including youth and young people and those with lived experience, throughout the resource.
- We emphasize the social and structural inequities that drive risk for violence, particularly for racial and ethnic minority groups.
- We have new guidance about correcting harmful narratives and avoiding stigmatizing language.
- We reviewed the latest evidence on the examples that were in the 2016 Youth Violence Technical Package and updated the summaries and evidence descriptions as needed.
- We added new examples and expanded the emphasis on the potential to advance equity.

This draft resource is now ready for feedback from partners who work every day to prevent community violence. Your input will help ensure we provide a resource that is relevant and actionable.

**As a reminder, please let us know by Thursday June 15<sup>th</sup> if you are available to review this resource.**

**Thank you,**

Hello Partners,

On behalf of the Centers for Disease Control and Prevention's Division of Violence Prevention (DVP), thank you for agreeing to review a draft of CDC's forthcoming **Community Violence Prevention Resource for Action: A Compilation of the Best Available Evidence for Youth and Young Adults**.

Guidance for Review:

- Attached is a PDF of the draft resource and the webinar slides to aid in your review.
- Later today, you should receive a separate email from Zoom with the email subject line: **Ebone Velasco shared a recording with you** with the webinar recording. If you do not received it, please contact Samantha McKeithan [ypl0@cdc.gov](mailto:ypl0@cdc.gov) and Ebone Velasco [otv9@cdc.gov](mailto:otv9@cdc.gov)
- Please send your feedback to Samantha McKeithan, [ypl0@cdc.gov](mailto:ypl0@cdc.gov) and Embree Moore [nvx3@cdc.gov](mailto:nvx3@cdc.gov) by **Tuesday July 11<sup>th</sup>**. If you need more time to submit comments, please reach out to us.
- We ask that reviewers **do not** forward the draft resource, webinar recording or slides beyond the review group.
- Note this document is not intended to be implementation guidance. CDC provides resources communities can use when selecting and implementing prevention strategies in [Violence Prevention in Practice](#).

### Considerations for Providing Feedback

- In your feedback, please let us know your impressions of what's good, what's missing, what might be dropped, whether anything is unclear, and other important information that can inform this resource.
- To help us at CDC organize all comments and ensure that your feedback is received, we suggest sending us a separate Word document that includes the following:
  - **Name(s) & Organization of Reviewer(s) for Acknowledgement**
    - *If more than one individual from an organization will be commenting, we ask for all comments to be combined into one Word document per organization and include the names of all individual reviewers. Please title your document as: **CV Prevention Resource for Action: (ORGANIZATION NAME) Review***
  - **Section & Page # for specific comments**
    - *We ask that reviewers please identify the section and page number associated with your comments in the Word document, when applicable. We won't be able to accept tracked changes or comments within the body of the PDF draft resource.*

We greatly appreciate your commitment as our partners who work every day to prevent community violence. Your input will help ensure we provide a resource that is relevant and actionable for preventing community violence and eliminating inequities in risk for community violence.

As a reminder, please send us your feedback by **Tuesday July 11th**.

Thank you,

-Sam

# Community Violence (CV) Definition

- Community violence (CV) includes violence in public spaces (e.g., streets, parks), and may not be limited to youth.
- Examples of CV include violence among youth and non-youth.
- Youth and non-youth are at greatest risk of CV.
- Youth and non-youth with racial and ethnic minority backgrounds experience higher rates of community violence.

**Subject:** Invitation to Review New Community Violence Prevention Resource for Action

Good afternoon Dr. Branas,

On behalf of the Centers for Disease Control and Prevention's Division of Violence Prevention (DVP), we invite you to review a draft of CDC's forthcoming **Community Violence Prevention Resource for Action: A Compilation of the Best Available Evidence for Youth and Young Adults**. Charlie, your personal research and your thoughtful reviews of the literature make you a great candidate to review this, if you have the time. We'd welcome your thoughts on anything important that is missing, anything that is there that should not be, and any suggestions to enhance the clarity of the strategies, approaches, and examples included.

**If you are interested in reviewing the draft, which is about 60 pages, please let us know by end-of-day Thursday, June 15th.** Below is a brief outline of what the review process will entail, including more information about the prevention resource for action:

- DVP will provide an overview of the Community Violence Prevent Resource for Action via a partner webinar, which is planned for **Tuesday June 20<sup>th</sup> 1-2pm ET**. We will send out more information at a later time.
- Immediately following the webinar, we will send the draft resource out for comments which will be due to Samantha McKeithan, [ypl0@cdc.gov](mailto:ypl0@cdc.gov) by **Tuesday July 11<sup>th</sup>**.
- Notes regarding the review process:
  - We ask that reviewers do not forward the draft document beyond the review group.
  - We won't be able to accept tracked changes or comments within the body of the PDF draft and ask that reviewers please provide their comments in a separate document.
  - If more than one individual from an organization will be commenting, we ask for all comments to be combined into one response per organization.
  - If you need more time to submit comments, please contact Samantha McKeithan at [ypl0@cdc.gov](mailto:ypl0@cdc.gov).

**The Community Violence Prevention Resource for Action: A Compilation of the Best Available Evidence for Youth and Young Adults** updates and expands on the 2016, [\*Comprehensive Technical Package for the Prevention of Youth Violence and Associated Risk Behaviors\*](#), one of a suite of violence prevention resources developed by DVP over the past several years to help communities make use of the best available evidence. Previously, these resources were called "technical packages" but are now referred to as "prevention resources." The **Community Violence Prevention Resource for Action** includes a select group of strategies based on the best available evidence to help communities and states sharpen their focus on approaches with the greatest potential to reduce community violence (including the most serious forms of violence) and inequities in risk for violence. We used the following

definition and information to guide development of the new **Community Violence Prevention Resource for Action**:

*“Community violence (CV) happens in public places (e.g., streets, schools, parks), between people who may or may not know each other. Examples include assaults, fights among groups, homicides, and fatal and nonfatal shootings. Youth and young adults (ages 10-34), are at greatest risk of CV, with youth and young adults from many racial and ethnic minority groups experiencing inequities in risk for CV.”*

Here’s a high-level overview of what the resource includes:

- We center communities, including youth and young people and those with lived experience, throughout the resource.
- We emphasize the social and structural inequities that drive risk for violence, particularly for racial and ethnic minority groups.
- We have new guidance about correcting harmful narratives and avoiding stigmatizing language.
- We reviewed the latest evidence on the examples that were in the 2016 Youth Violence Technical Package and updated the summaries and evidence descriptions as needed.
- We added new examples and expanded the emphasis on the potential to advance equity.

This draft resource is now ready for feedback from partners who work every day to prevent community violence. Your input will help ensure we provide a resource that is relevant and actionable.

**As a reminder, please let us know by Thursday June 15<sup>th</sup> if you are available to review this resource.**

**Thank you for considering this.**

**Tom Simon**

**Subject:** Invitation to Review New Community Violence Prevention Resource for Action

Good afternoon Dr. Gorman-Smith,

It has been a long time since we last spoke, Deb. I hope you are doing well! On behalf of the Centers for Disease Control and Prevention's Division of Violence Prevention (DVP), we invite you to review a draft of CDC's forthcoming **Community Violence Prevention Resource for Action: A Compilation of the Best Available Evidence for Youth and Young Adults**.

**If you are interested in reviewing the draft, which is about 60 pages, please let us know by end-of-day Thursday, June 15th.** Below is a brief outline of what the review process will entail, including more information about the prevention resource for action:

- DVP will provide an overview of the Community Violence Prevent Resource for Action via a partner webinar, which is planned for **Tuesday June 20<sup>th</sup> 1-2pm ET**. We will send out more information at a later time.
- Immediately following the webinar, we will send the draft resource out for comments which will be due to Samantha McKeithan, [ypl0@cdc.gov](mailto:ypl0@cdc.gov) by **Tuesday July 11<sup>th</sup>**.
- Notes regarding the review process:
  - We ask that reviewers do not forward the draft document beyond the review group.
  - We won't be able to accept tracked changes or comments within the body of the PDF draft and ask that reviewers please provide their comments in a separate document.
  - If more than one individual from an organization will be commenting, we ask for all comments to be combined into one response per organization.
  - If you need more time to submit comments, please contact Samantha McKeithan at [ypl0@cdc.gov](mailto:ypl0@cdc.gov).

**The Community Violence Prevention Resource for Action: A Compilation of the Best Available Evidence for Youth and Young Adults** updates and expands on the 2016, [\*Comprehensive Technical Package for the Prevention of Youth Violence and Associated Risk Behaviors\*](#), one of a suite of violence prevention resources developed by DVP over the past several years to help communities make use of the best available evidence. Previously, these resources were called "technical packages" but are now referred to as "prevention resources." The **Community Violence Prevention Resource for Action** includes a select group of strategies based on the best available evidence to help communities and states sharpen their focus on approaches with the greatest potential to reduce community violence (including the most serious forms of violence) and inequities in risk for violence. We used the following definition and information to guide development of the new **Community Violence Prevention Resource for Action**:

*“Community violence (CV) happens in public places (e.g., streets, schools, parks), between people who may or may not know each other. Examples include assaults, fights among groups, homicides, and fatal and nonfatal shootings. Youth and young adults (ages 10-34), are at greatest risk of CV, with youth and young adults from many racial and ethnic minority groups experiencing inequities in risk for CV.”*

Here’s a high-level overview of what the resource includes:

- We center communities, including youth and young people and those with lived experience, throughout the resource.
- We emphasize the social and structural inequities that drive risk for violence, particularly for racial and ethnic minority groups.
- We have new guidance about correcting harmful narratives and avoiding stigmatizing language.
- We reviewed the latest evidence on the examples that were in the 2016 Youth Violence Technical Package and updated the summaries and evidence descriptions as needed.
- We added new examples and expanded the emphasis on the potential to advance equity.

This draft resource is now ready for feedback from partners who work every day to prevent community violence. Your input will help ensure we provide a resource that is relevant and actionable.

**As a reminder, please let us know by Thursday June 15<sup>th</sup> if you are available to review this resource.**

**Thank you for considering this, Deb! Your experience working with communities will be very helpful.**

**Subject:** Invitation to Review New Community Violence Prevention Resource for Action

Good afternoon Dr. Tillmon,

It was so great to see you at the NVDRS conference, Chico! As I mentioned briefly, on behalf of the Centers for Disease Control and Prevention's Division of Violence Prevention (DVP), we invite you to review a draft of CDC's forthcoming **Community Violence Prevention Resource for Action: A Compilation of the Best Available Evidence for Youth and Young Adults**.

**If you are interested in reviewing the draft, which is about 60 pages, please let us know by end-of-day Thursday, June 15th.** Below is a brief outline of what the review process will entail, including more information about the prevention resource for action:

- DVP will provide an overview of the Community Violence Prevent Resource for Action via a partner webinar, which is planned for **Tuesday June 20<sup>th</sup> 1-2pm ET**. We will send out more information at a later time.
- Immediately following the webinar, we will send the draft resource out for comments which will be due to Samantha McKeithan, [ypl0@cdc.gov](mailto:ypl0@cdc.gov) by **Tuesday July 11<sup>th</sup>**.
- Notes regarding the review process:
  - We ask that reviewers do not forward the draft document beyond the review group.
  - We won't be able to accept tracked changes or comments within the body of the PDF draft and ask that reviewers please provide their comments in a separate document.
  - If more than one individual from an organization will be commenting, we ask for all comments to be combined into one response per organization.
  - If you need more time to submit comments, please contact Samantha McKeithan at [ypl0@cdc.gov](mailto:ypl0@cdc.gov).

**The Community Violence Prevention Resource for Action: A Compilation of the Best Available Evidence for Youth and Young Adults** updates and expands on the 2016, [\*Comprehensive Technical Package for the Prevention of Youth Violence and Associated Risk Behaviors\*](#), one of a suite of violence prevention resources developed by DVP over the past several years to help communities make use of the best available evidence. Previously, these resources were called "technical packages" but are now referred to as "prevention resources." The **Community Violence Prevention Resource for Action** includes a select group of strategies based on the best available evidence to help communities and states sharpen their focus on approaches with the greatest potential to reduce community violence (including the most serious forms of violence) and inequities in risk for violence. We used the following definition and information to guide development of the new **Community Violence Prevention Resource for Action**:

*“Community violence (CV) happens in public places (e.g., streets, schools, parks), between people who may or may not know each other. Examples include assaults, fights among groups, homicides, and fatal and nonfatal shootings. Youth and young adults (ages 10-34), are at greatest risk of CV, with youth and young adults from many racial and ethnic minority groups experiencing inequities in risk for CV.”*

Here’s a high-level overview of what the resource includes:

- We center communities, including youth and young people and those with lived experience, throughout the resource.
- We emphasize the social and structural inequities that drive risk for violence, particularly for racial and ethnic minority groups.
- We have new guidance about correcting harmful narratives and avoiding stigmatizing language.
- We reviewed the latest evidence on the examples that were in the 2016 Youth Violence Technical Package and updated the summaries and evidence descriptions as needed.
- We added new examples and expanded the emphasis on the potential to advance equity.

This draft resource is now ready for feedback from partners who work every day to prevent community violence. Your input will help ensure we provide a resource that is relevant and actionable.

**Subject:** Invitation to Review New Community Violence Prevention Resource for Action

Good afternoon,

On behalf of the Centers for Disease Control and Prevention's Division of Violence Prevention (DVP), we invite you to review a draft of CDC's forthcoming **Community Violence Prevention Resource for Action: A Compilation of the Best Available Evidence for Youth and Young Adults**.

If you are interested in reviewing the draft, which is about 60 pages, please let us know by end-of-day **Thursday, June 15th**. Below is a brief outline of what the review process will entail, including more information about the prevention resource for action:

- DVP will provide an overview of the Community Violence Prevent Resource for Action via a partner webinar, which is planned for **Tuesday June 20<sup>th</sup> 1-2pm ET**. We will send out more information at a later time.
- Immediately following the webinar, we will send the draft resource out for comments which will be due to Samantha McKeithan, [ypi0@cdc.gov](mailto:ypi0@cdc.gov) by **Tuesday July 11<sup>th</sup>**.
- Notes regarding the review process:
  - We ask that reviewers do not forward the draft document beyond the review group.
  - We won't be able to accept tracked changes or comments within the body of the PDF draft and ask that reviewers please provide their comments in a separate document.
  - If more than one individual from an organization will be commenting, we ask for all comments to be combined into one response per organization.
  - If you need more time to submit comments, please contact Samantha McKeithan at [ypi0@cdc.gov](mailto:ypi0@cdc.gov).

**The Community Violence Prevention Resource for Action: A Compilation of the Best Available Evidence for Youth and Young Adults** updates and expands on the 2016, [\*Comprehensive Technical Package for the Prevention of Youth Violence and Associated Risk Behaviors\*](#), one of a suite of violence prevention resources developed by DVP over the past several years to help communities make use of the best available evidence. Previously, these resources were called "technical packages" but are now referred to as "prevention resources." The **Community Violence Prevention Resource for Action** includes a select group of strategies based on the best available evidence to help communities and states sharpen their focus on approaches with the greatest potential to reduce community violence (including the most serious forms of violence) and inequities in risk for violence. We used the following definition and information to guide development of the new **Community Violence Prevention Resource for Action**:

*"Community violence (CV) happens in public places (e.g., streets, schools, parks), between people who may or may not know each other. Examples include assaults, fights among groups, homicides, and fatal and nonfatal shootings. Youth and young adults (ages 10-34), are at greatest risk of CV, with youth and young adults from many racial and ethnic minority groups experiencing inequities in risk for CV."*

Here's a high-level overview of what that includes:

- We center communities, including youth and young people and those with lived experience, throughout the resource.
- We emphasize the social and structural inequities that drive risk for violence, particularly for racial and ethnic minority groups.
- We have new guidance about correcting harmful narratives and avoiding stigmatizing language.
- We reviewed the latest evidence on the examples that were in the 2016 Youth Violence Technical Package and updated the summaries and evidence descriptions as needed.
- We added new examples and expanded the emphasis on the potential to advance equity.

This draft resource is now ready for feedback from partners who work every day to prevent community violence. Your input will help ensure we provide a resource that is relevant and actionable.

**As a reminder, please let us know by Thursday June 15<sup>th</sup> if you are available to review this resource.**

**Subject:** RE: CDC Community Violence Prevention Resource for Action launch

OC concurs with us sending back a response from our DVP public inquiries box. Here's the response:

Thank you for your interest in the forthcoming Community Violence Prevention Resource for Action. The resource and its supporting materials are still undergoing CDC review and are in draft format. The resource will be a compilation of examples of the best available evidence to prevent community violence before it happens based on research showing effects on violence or the behaviors or conditions that affect risk for violence. The programs, policies, and practices in the resource are from meta-analyses or systematic reviews and other rigorous evaluations (such as randomized controlled trial or quasi-experimental design). The document posted online was a draft internal planning document and not the full resource.

Thanks. I was actually thinking about something similar this weekend. I think Tom had a good response to a reporter awhile back about the PH approach to violence being complementary to the criminal justice approach and helping to make law enforcement's job easier (or something along those lines...).

**Subject:** RE: CDC Community Violence Prevention Resource for Action launch

For your consideration, I would add these three words. What seems to be missing from the dialog / or responses, and which could create challenges moving forward, is that the Resource for Action is not meant to replace justice approaches, or to eliminate the criminal justice system, but is instead complementary to law enforcement efforts.

+ Beth as well.

I think we have two options:

1. Do not respond. I see this more as feedback than an actual question. The first question posed seems rhetorical.
2. Respond with something along the lines of the following (our original response to the reporter plus a bit of additional info):

Thank you for your interest in the forthcoming Community Violence Prevention Resource for Action. The resource and its supporting materials are still undergoing CDC review and are in draft format. The resource will be a compilation of examples of the best available evidence to prevent community violence **before it happens** based on research showing effects on violence or the behaviors or conditions that affect risk for violence. The programs, policies, and practices in the resource are from meta-analyses or systematic reviews and other rigorous evaluations (such as randomized controlled trial or quasi-experimental design). The document posted online was a draft internal planning document and not the full resource.

We have a meeting with OC at 10. I can also seek their advice on how to handle if that would be helpful.

Under the Data Quality Act, doesn't the CDC have to have a factual basis for claims it makes?

A draft CDC Community Violence Prevention Resource claims that "Evidence shows that increasing punitive measures, including incarceration, does not reduce community violence." The draft is posted in the news article, "EXCLUSIVE: CDC Champions Addressing Racism, 'Injustices' Over Jailing Criminals to Prevent Violence," Daily Caller, January 5, 2024, found at <https://dailycaller.com/2024/01/05/cdc-criminal-justice-community-violence/>.

That claim isn't accurate. Studies and real life refute it. There are real life examples of incarceration and other punitive measures reducing community violence.

There are many examples of serial killers and other repeat criminals who kept committing acts of violence until they were incarcerated or executed, at which point, they stopped committing violent crimes because they were incarcerated, and thus unable to commit more crimes. So catching more

violent criminals -- that is, increasing punitive measures -- does reduce community violence, by keeping dangerous criminals from committing more crimes with impunity.

For example, the serial killer Joseph Paul Franklin killed at least 11 people, but stopped killing people when he was arrested and incarcerated (Years later, he was executed for his murders). See *Joseph Paul Franklin*, Wikipedia, [https://en.wikipedia.org/wiki/Joseph\\_Paul\\_Franklin](https://en.wikipedia.org/wiki/Joseph_Paul_Franklin).

Studies also find that incarceration reduces crime, and that releasing inmates early increases the crime rate. See, e.g., Alessandro Barbarino & Giovanni Mastrobuono, *the Incapacitation Effect of Incarceration from Several Italian Collective Pardons*, *American Economic Journal*, Vol. 6, No. 1, pp. 1-37 (2014), available at <https://www.aeaweb.org/articles?id=10.1257/pol.6.1.1>

Some studies also find that longer prison sentences deter crime more effectively than shorter sentences. See, e.g., Daniel Kessler & Steven D. Levitt, *Using Sentence Enhancements to Distinguish between Deterrence and Incapacitation*, National Bureau of Economic Research Working Paper 6484 (1998), <https://www.nber.org/papers/w6484>.

A study concluded that certain crimes in California fell significantly because California voters adopted Proposition 8, which mandated longer sentences for repeat offenders who kill, rape, and rob others. It found those longer sentences deterred many crimes from being committed. Its finding reflected the fact that three years after Proposition 8 was adopted, crimes punished with enhanced sentences had "fallen roughly 20-40 percent compared to" crimes not covered by enhanced sentences. See Kessler & Levitt, *Using Sentence Enhancements to Distinguish between Deterrence and Incapacitation*, National Bureau of Economic Research Working Paper 6484 (1998), <https://www.nber.org/papers/w6484>.

If people are more likely to get away with murder or other serious violent crimes, and avoid incarceration, then they are more likely to commit those crimes. America has a lower rate of catching murderers than Europe, which experts think contributes to it having a higher homicide rate than Europe. NPR cited a researcher -- Philip Cook at Duke University -- pointing out that incarceration is needed for deterrence, but that isn't happening in places in the United States where rates of catching murderers (clearance rates) are very low. Those low clearance rates fuel devastating high homicide rates in the inner city. Duke University's Philip Cook described "low clearance rates undermining future investigations and potentially driving up the murder rate in some minority communities where lack of arrests undermines deterrence," according to NPR. See Eric Westervelt, "More people are getting away with murder. Unsolved killings reach a record high," NPR, April 29, 2023, available at <https://www.npr.org/2023/04/29/1172899691/more-people-are-getting-away-with-murder-unsolved-killings-reach-a-record-high>.

Maryland and Virginia are adjacent states that are rather similar, but Virginia has a much lower crime rate, apparently because it incarcerates inmates longer for the same offense than Maryland does, further illustrating that "increasing punitive measures" does reduce community violence to some extent.

Counties in Maryland have much higher crime rates than the neighboring counties they border in Virginia, as news articles and think-tanks have pointed out. For example, the Heritage Foundation described how Virginia's Fairfax County ended up with less than half the crime of neighboring Montgomery County, Maryland after Virginia cracked down on crime, abolishing parole for violent felons. See, e.g., David B. Mulhausen, *ED120999: Crime in Two Counties*, Heritage Foundation, Dec. 3, 1999, available at <https://www.heritage.org/crime-and-justice/commentary/ed120999-crime-two-counties>.

Virginia has much lower rates of robbery, murder, assault, and property crime than Maryland does. Especially robbery -- Virginia gives robbers much harsher sentences for robbery than Maryland does.

Virginia has a higher incarceration rate and lower crime rate and murder rate than Maryland, according to USA Today. See *High crime rate: What states are the most dangerous, with most violent crimes per capita?*, USA Today, Jan. 13, 2020, <https://www.usatoday.com/picture-gallery/money/2020/01/13/most-dangerous-states-in-america/40969391/>

In light of such studies and real life examples, it is a mistake for CDC to claim that "increasing punitive measures, including incarceration, does not reduce community violence."

Claiming that would be at odds with the Data Quality Act, also known as the Information Quality Act.

The CDC Community Violence Prevention Resource for Action should be revised to reflect that. Thank you for reviewing this.

In light of such studies and real life examples, it is a mistake for CDC to claim that "increasing punitive measures, including incarceration, does not reduce community violence."

Claiming that would be at odds with the Data Quality Act, also known as the Information Quality Act.

The CDC Community Violence Prevention Resource for Action should be revised to reflect that. Thank you for reviewing this.

Hi Tom,

Thanks again for sharing the community violence prevention resource. There is a lot of good information and the time and effort to pull this together is quite apparent.

I have gone through the document a couple of times and jotted down notes but am thinking it may be better to discuss by phone. That way you can give me a little more background on some of the content and reasoning behind some of way the information is structured and presented. There are a number of

**Subject:** Community Violence Prevention Resource for Action Review

Hi Linda,

Here is the DRAFT update and expansion of the Youth Violence Prevention Technical Package that we discussed. We are at a point where we are sharing a draft with external partners for their review. We are providing the following explanation that you might find helpful: "**The Community Violence Prevention Resource for Action: A Compilation of the Best Available Evidence for Youth and Young Adults** updates and expands on the 2016, [\*Comprehensive Technical Package for the Prevention of Youth Violence and Associated Risk Behaviors\*](#), one of a suite of violence prevention resources developed by DVP over the past several years to help communities make use of the best available evidence. Previously, these resources were called "technical packages" but are now referred to as "prevention resources." The **Community Violence Prevention Resource for Action** includes a select group of strategies based on the best available evidence to help communities and states sharpen their focus on approaches with the greatest potential to reduce community violence (including the most serious forms of violence) and inequities in risk for violence."

Here's a high-level overview of what the resource includes:

- We center communities, including youth and young people and those with lived experience, throughout the resource.
- We emphasize the social and structural inequities that drive risk for violence, particularly for racial and ethnic minority groups.
- We have new guidance about correcting harmful narratives and avoiding stigmatizing language.
- We reviewed the latest evidence on the examples that were in the 2016 Youth Violence Technical Package and updated the summaries and evidence descriptions as needed.
- We added new examples and expanded the emphasis on the potential to advance equity.

We hosted a webinar with external partners who expressed interest in reviewing the draft resource. The partners include a mix of practitioners, researchers, and federal colleagues. Below is the email that we sent and attached is the draft resource and the slides that we used in the webinar.

We acknowledge the authors of the 2016 YV TP on the authorship page. The CV prevention resource is the second TP to be updated. The first was the [Suicide Prevention Resource for Action \(cdc.gov\)](#) and we adapted the approach that they used to acknowledge authors across the two editions.

Thank you, Linda, for providing such a strong and lasting foundation for violence prevention work! The technical packages have been such an amazing resource. We hope that we can continue the legacy that you started!

-Tom

\*\*\*\*\*

Hello Partners,

On behalf of the Centers for Disease Control and Prevention's Division of Violence Prevention (DVP), thank you for agreeing to review a draft of CDC's forthcoming **Community Violence Prevention Resource for Action: A Compilation of the Best Available Evidence for Youth and Young Adults**.

Guidance for Review:

- Attached is a PDF of the draft resource and the webinar slides to aid in your review.
- Later today, you should receive a separate email from Zoom with the email subject line: **Ebone Velasco shared a recording with you** with the webinar recording. If you do not received it, please contact Samantha McKeithan [ypl0@cdc.gov](mailto:ypl0@cdc.gov) and Ebone Velasco [otv9@cdc.gov](mailto:otv9@cdc.gov)
- Please send your feedback to Samantha McKeithan, [ypl0@cdc.gov](mailto:ypl0@cdc.gov) and Embree Moore [nvx3@cdc.gov](mailto:nvx3@cdc.gov) by **Tuesday July 11<sup>th</sup>**. If you need more time to submit comments, please reach out to us.
- We ask that reviewers **do not** forward the draft resource, webinar recording or slides beyond the review group.
- Note this document is not intended to be implementation guidance. CDC provides resources communities can use when selecting and implementing prevention strategies in [Violence Prevention in Practice](#).

Considerations for Providing Feedback

- In your feedback, please let us know your impressions of what's good, what's missing, what might be dropped, whether anything is unclear, and other important information that can inform this resource.
- To help us at CDC organize all comments and ensure that your feedback is received, we suggest sending us a separate Word document that includes the following:

○ **Name(s) & Organization of Reviewer(s) for Acknowledgement**

- *If more than one individual from an organization will be commenting, we ask for all comments to be combined into one Word document per organization and include the names of all individual reviewers. Please title your document as: **CV Prevention Resource for Action: (ORGANIZATION NAME) Review***

○ **Section & Page # for specific comments**

- *We ask that reviewers please identify the section and page number associated with your comments in the Word document, when applicable. We won't be able to accept tracked changes or comments within the body of the PDF draft resource.*

We greatly appreciate your commitment as our partners who work every day to prevent community violence. Your input will help ensure we provide a resource that is relevant and actionable for preventing community violence and eliminating inequities in risk for community violence.

As a reminder, please send us your feedback by **Tuesday July 11th**.

Thank you,

-Sam

**Subject:** CV/YV Prevention Resource

Hi Marilyn and Denise,

I hope you had a good weekend. As you might have heard, the YVET team in REB is hosting a reverse site visit (RSV) September 13-14 with the YVPCs and CVPIs (a new acronym for the two community violence cooperative agreements). I am scheduled to do a brief presentation on community violence and talk about how this work emerged in DVP. I thought it would be a good time to mention the new Prevention Resource to our YVPC and CVPI recipients. I know you two have been working hard on it. Would you be okay if I talked about it briefly? Is there anything I can share as a sneak peek? Marilyn, perhaps I could take a look at the slides you did when soliciting partner feedback? Anything you could share about the anticipated timeline would be helpful too.

Also, if you don't have the RSV on your schedule and would like to attend, I'm happy to forward the invite.

Thanks,  
Ashley

**Subject:** [EXTERNAL] DOJ Invitation to Review New Community Violence Prevention Resource for Action

Good Afternoon,

On behalf of the Centers for Disease Control and Prevention's Division of Violence Prevention (DVP), we invite you to review a draft of CDC's forthcoming **Community Violence Prevention Resource for Action: A Compilation of the Best Available Evidence for Youth and Young Adults**.

If you are interested in reviewing the draft, which is about 60 pages, please let us know by end-of-day **Thursday, June 15th**. Below is a brief outline of what the review process will entail, including more information about the prevention resource for action:

- DVP will provide an overview of the Community Violence Prevent Resource for Action via a partner webinar, which is planned for **Tuesday June 20<sup>th</sup> 1-2pm ET**. We will send out more information at a later time.
- Immediately following the webinar, we will send the draft resource out for comments which will be due to Samantha McKeithan, [ypl0@cdc.gov](mailto:ypl0@cdc.gov) by **Tuesday July 11<sup>th</sup>**.
- Notes regarding the review process:
  - We ask that reviewers do not forward the draft document beyond the review group.
  - We won't be able to accept tracked changes or comments within the body of the PDF draft and ask that reviewers please provide their comments in a separate document.
  - If more than one individual from an organization will be commenting, we ask for all comments to be combined into one response per organization.
  - If you need more time to submit comments, please contact Samantha McKeithan at [ypl0@cdc.gov](mailto:ypl0@cdc.gov).

**The Community Violence Prevention Resource for Action: A Compilation of the Best Available Evidence for Youth and Young Adults** updates and expands on the 2016, [\*Comprehensive Technical Package for the Prevention of Youth Violence and Associated Risk Behaviors\*](#), one of a suite of violence prevention resources developed by DVP over the past several years to help communities make use of the best available evidence. Previously, these resources were called "technical packages" but are now referred to as "prevention resources." The **Community Violence Prevention Resource for Action** includes a select group of strategies based on the best available evidence to help communities and states sharpen their focus on approaches with the greatest potential to reduce community violence (including the most serious forms of violence) and inequities in risk for violence. We used the following definition and information to guide development of the new **Community Violence Prevention Resource for Action**:

*“Community violence (CV) happens in public places (e.g., streets, schools, parks), between people who may or may not know each other. Examples include assaults, fights among groups, homicides, and fatal and nonfatal shootings. Youth and young adults (ages 10-34), are at greatest risk of CV, with youth and young adults from many racial and ethnic minority groups experiencing inequities in risk for CV.”*

Here’s a high-level overview of what that includes:

- We center communities, including youth and young people and those with lived experience, throughout the resource.
- We emphasize the social and structural inequities that drive risk for violence, particularly for racial and ethnic minority groups.
- We have new guidance about correcting harmful narratives and avoiding stigmatizing language.
- We reviewed the latest evidence on the examples that were in the 2016 Youth Violence Technical Package and updated the summaries and evidence descriptions as needed.
- We added new examples and expanded the emphasis on the potential to advance equity.

This draft resource is now ready for feedback from partners who work every day to prevent community violence. Your input will help ensure we provide a resource that is relevant and actionable.

**As a reminder, please let us know by Thursday June 15<sup>th</sup> if you are available to review this resource.**

**Thank you,**

***Samantha S. McKeithan, MPH (she/her)***

Hi again Robert,

Thanks for your patience!

And thank you for your interest in the forthcoming Community Violence Prevention Resource for Action. The resource and its supporting materials are still undergoing CDC review. The resource will be a compilation of examples of the best available evidence to prevent community violence based on research showing effects on violence or the behaviors or conditions that affect risk for violence. The programs, policies, and practices in the resource are from meta-analyses or systematic reviews and other rigorous evaluations (such as randomized controlled trial [RCT] or quasi-experimental design).

We would be happy to respond to your questions or schedule an interview about the final content of the resource upon its release.

Cassie

1. The CDC argues that "consider[ing] violence primarily a problem of personal responsibility" is both "biased and inaccurate" and can be harmful to black and latino communities. Could someone expand on the reasoning behind that statement?

2. The CDC claims that incarceration and other punitive measures are not effective at preventing gun violence. Could the CDC provide the evidence it cites for this claim? How does the CDC weigh that evidence against competing evidence?

3. Could the CDC expand on why it believes targeting the root causes of gun violence, like racism or structural inequality, would be more effective than other approaches?

Hi Cassie,

Yes, we are planning to use this in a piece we're working on. Would someone be available tomorrow to answer some of our questions? I'm happy to correspond via email or on the phone, whichever is easier on your end.

Thanks,

Robert

On Thu, Jan 4, 2024 at 5:09 PM Strawn, Catherine (Cassie) (CDC/NCIPC/OD) <[ftk3@cdc.gov](mailto:ftk3@cdc.gov)> wrote:

Hi Rob,

I hope you're well.

I'm writing to address the below email.

As you can tell, I sent this to you inadvertently; it was intended for one of my CDC colleagues.

The information in the document supports a new technical resource, the Community Violence Resource for Action, which we hope to release at the end of January.

What you received is an embargoed, internal document.

I'd like to ask that if you use any of this information please let me know ahead of time – we would be happy to set up a formal interview.

Thanks, and I apologize for the confusion.

Cassie

**Subject:** FW: copies of CV RFA rollout docs to send to Center

Hi Cassidy,

Attached here are Lourdes' comments on the RO.

I'm thinking you all may want to address these as I move this on to OPP (then OD3), and you may want to make the document shareable so it's easier to review and reconcile.

Could you let me know when you've done that, and I'll send on to OPP?

As you can tell, we'll need more time to review – I just got back from leave this morning.

Will end of next week be problematic?

Thanks!

Cassie

Tom,

Thanks for sending this along. I'm on vacation and in transit, so I'm going to need to make this quick. I did have an opportunity to skim both the resource and the slides, however, so here are some high-level observations:

(b)(5)

(b)(5)

These are just my first impressions, and obviously I have a very focused perspective that is not shared by everyone. Please feel free to accept these suggestions or discard them if they are not useful. I appreciate you asking for my feedback and I look forward to working more together in the future.

Finally, yes to the webinar! Would be happy to do it.

Best,  
Thomas

Hi Thomas,

We enjoyed talking with you last week and learning more about your work at the (b)(6) and your important CV prevention efforts in cities. (b)(6) and he described the substantial concerns that he has been hearing about violence in the city. I hope that you get a chance to provide some guidance to leadership there.

I mentioned that we are in the process of updating and expanding what was the [Youth Violence Prevention](#) technical package to focus on Community Violence Prevention. We have circulated a draft version of the updated resource to a diverse group of researchers, practitioners, and partners. I would also welcome your informal review if you have the time to offer suggestions for ways to make this more useful to communities. I have attached the draft resource here. Also, we hosted a webinar with some partners a few weeks ago to describe our goals and the changes made, and I have attached the slides from that as well. The email below describes the formal review process and timeline. It would be most helpful to receive any suggestions by 7/11, if possible.

Thank you for considering this! I look forward talking further about a possible webinar on the work of the VRC for CDC staff. I think this will be very interesting to a range of staff in DVP. Could we start to plan for something toward the end of the year?

-Tom

Hello Partners,

On behalf of the Centers for Disease Control and Prevention's Division of Violence Prevention (DVP), thank you for agreeing to review a draft of CDC's forthcoming **Community Violence Prevention Resource for Action: A Compilation of the Best Available Evidence for Youth and Young Adults**.

Guidance for Review:

- Attached is a PDF of the draft resource and the webinar slides to aid in your review.
- Later today, you should receive a separate email from Zoom with the email subject line: **Ebone Velasco shared a recording with you** with the webinar recording. If you do not receive it, please contact Samantha McKeithan [yp10@cdc.gov](mailto:yp10@cdc.gov) and Ebone Velasco [otv9@cdc.gov](mailto:otv9@cdc.gov)
- Please send your feedback to Samantha McKeithan, [yp10@cdc.gov](mailto:yp10@cdc.gov) and Embree Moore [nvx3@cdc.gov](mailto:nvx3@cdc.gov) by **Tuesday July 11<sup>th</sup>**. If you need more time to submit comments, please reach out to us.
- We ask that reviewers **do not** forward the draft resource, webinar recording or slides beyond the review group.
- Note this document is not intended to be implementation guidance. CDC provides resources communities can use when selecting and implementing prevention strategies in [Violence Prevention in Practice](#).

Considerations for Providing Feedback

- In your feedback, please let us know your impressions of what's good, what's missing, what might be dropped, whether anything is unclear, and other important information that can inform this resource.
- To help us at CDC organize all comments and ensure that your feedback is received, we suggest sending us a separate Word document that includes the following:
  - **Name(s) & Organization of Reviewer(s) for Acknowledgement**
    - *If more than one individual from an organization will be commenting, we ask for all comments to be combined into one Word document per organization and include the names of all individual reviewers. Please title your document as: **CV Prevention Resource for Action: (ORGANIZATION NAME) Review***

o **Section & Page # for specific comments**

- *We ask that reviewers please identify the section and page number associated with your comments in the Word document, when applicable. We won't be able to accept tracked changes or comments within the body of the PDF draft resource.*

We greatly appreciate your commitment as our partners who work every day to prevent community violence. Your input will help ensure we provide a resource that is relevant and actionable for preventing community violence and eliminating inequities in risk for community violence.

As a reminder, please send us your feedback by **Tuesday July 11th**.

Thank you,

-Sam

**Subject:** Re: Guidance for Community Violence Prevention Resource for Action Review: Feedback Due July 11th

Sam,

My heart is full after reading the Community Violence Prevention Resource for Action. We know from research that there is no such thing as a perfect document, but this is clearly a giant step in the right direction. There were a few things that maybe could have been touched on. (b)(5)

(b)(5)

(b)(5)

Outside of these small suggestions, I believe this document is very well written and will be a huge asset for the field of Community Violence Intervention. I am somewhat old school, I printed the document and wrote notes/ comments on the paper, if you would like to discuss any particular part of it. Thank you so much for sharing this and I apologize for the delay in responding to you. If you provided a form for feedback that I am unaware of, please send it and I will fill it out expeditiously.

My Best,

**Subject:** FW: Guidance for Community Violence Prevention Resource for Action Review: Feedback Due July 11th

Good Afternoon Chico,

Hope you are having a good week so far. We wanted to check in and see if you were still able to provide a review of CDC's Community Violence Prevention Resource for Action.

Thanks!  
Sam

**Subject:** Guidance for Community Violence Prevention Resource for Action Review: Feedback Due July 11th

Hello Partners,

On behalf of the Centers for Disease Control and Prevention's Division of Violence Prevention (DVP), thank you for agreeing to review a draft of CDC's forthcoming **Community Violence Prevention Resource for Action: A Compilation of the Best Available Evidence for Youth and Young Adults**.

[Guidance for Review:](#)

- Attached is a PDF of the draft resource and the webinar slides to aid in your review.
- Later today, you should receive a separate email from Zoom with the email subject line: **Ebone Velasco shared a recording with you** with the webinar recording. If you do not received it, please contact Samantha McKeithan [ypl0@cdc.gov](mailto:ypl0@cdc.gov) and Ebone Velasco [otv9@cdc.gov](mailto:otv9@cdc.gov)
- Please send your feedback to Samantha McKeithan, [ypl0@cdc.gov](mailto:ypl0@cdc.gov) and Embree Moore [nvx3@cdc.gov](mailto:nvx3@cdc.gov) by **Tuesday July 11<sup>th</sup>**. If you need more time to submit comments, please reach out to us.
- We ask that reviewers **do not** forward the draft resource, webinar recording or slides beyond the review group.
- Note this document is not intended to be implementation guidance. CDC provides resources communities can use when selecting and implementing prevention strategies in [Violence Prevention in Practice](#).

#### Considerations for Providing Feedback

- In your feedback, please let us know your impressions of what's good, what's missing, what might be dropped, whether anything is unclear, and other important information that can inform this resource.
- To help us at CDC organize all comments and ensure that your feedback is received, we suggest sending us a separate Word document that includes the following:
  - **Name(s) & Organization of Reviewer(s) for Acknowledgement**
    - *If more than one individual from an organization will be commenting, we ask for all comments to be combined into one Word document per organization and include the names of all individual reviewers. Please title your document as: **CV Prevention Resource for Action: (ORGANIZATION NAME) Review***
  - **Section & Page # for specific comments**
    - *We ask that reviewers please identify the section and page number associated with your comments in the Word document, when applicable. We won't be able to accept tracked changes or comments within the body of the PDF draft resource.*

We greatly appreciate your commitment as our partners who work every day to prevent community violence. Your input will help ensure we provide a resource that is relevant and actionable for preventing community violence and eliminating inequities in risk for community violence.

As a reminder, please send us your feedback by **Tuesday July 11th**.

Thank you,

-Sam

Hi Sam,

I hope you're doing well. Time has gotten away from me, and I won't be able to get this reviewed by today. Can I get it to you next week? I'm out at meetings the rest of this week.

My apologies! I understand if you can't wait for my comments.

Thanks,

Kayla

**Subject:** Guidance for Community Violence Prevention Resource for Action Review: Feedback Due July 11th

Hello Partners,

On behalf of the Centers for Disease Control and Prevention's Division of Violence Prevention (DVP), thank you for agreeing to review a draft of CDC's forthcoming **Community Violence Prevention Resource for Action: A Compilation of the Best Available Evidence for Youth and Young Adults**.

#### Guidance for Review:

- Attached is a PDF of the draft resource and the webinar slides to aid in your review.
- Later today, you should receive a separate email from Zoom with the email subject line: **Ebone Velasco shared a recording with you** with the webinar recording. If you do not received it, please contact Samantha McKeithan [ypl0@cdc.gov](mailto:ypl0@cdc.gov) and Ebone Velasco [otv9@cdc.gov](mailto:otv9@cdc.gov)
- Please send your feedback to Samantha McKeithan, [ypl0@cdc.gov](mailto:ypl0@cdc.gov) and Embree Moore [nvx3@cdc.gov](mailto:nvx3@cdc.gov) by **Tuesday July 11<sup>th</sup>**. If you need more time to submit comments, please reach out to us.
- We ask that reviewers **do not** forward the draft resource, webinar recording or slides beyond the review group.
- Note this document is not intended to be implementation guidance. CDC provides resources communities can use when selecting and implementing prevention strategies in [Violence Prevention in Practice](#).

#### Considerations for Providing Feedback

- In your feedback, please let us know your impressions of what's good, what's missing, what might be dropped, whether anything is unclear, and other important information that can inform this resource.
- To help us at CDC organize all comments and ensure that your feedback is received, we suggest sending us a separate Word document that includes the following:
  - **Name(s) & Organization of Reviewer(s) for Acknowledgement**
    - *If more than one individual from an organization will be commenting, we ask for all comments to be combined into one Word document per organization and*

*include the names of all individual reviewers. Please title your document as: CV Prevention Resource for Action: (ORGANIZATION NAME) Review*

- **Section & Page # for specific comments**
  - *We ask that reviewers please identify the section and page number associated with your comments in the Word document, when applicable. We won't be able to accept tracked changes or comments within the body of the PDF draft resource.*

We greatly appreciate your commitment as our partners who work every day to prevent community violence. Your input will help ensure we provide a resource that is relevant and actionable for preventing community violence and eliminating inequities in risk for community violence.

As a reminder, please send us your feedback by **Tuesday July 11th**.

Thank you,

-Sam

Hi all,

Given Sam and Embree's need to focus on their tribal consultation project, they will not be alerting us each time comments are received from reviewers. They will add them to folders (link below) as they arrive; we can check as we are interested or time allows.

Thanks, everyone. Have a good weekend!

Marilyn

Hi Tom,

Wanted to check in if you received any feedback from the YV technical package authors? I have not received anything from them yet and I sent out a reminder to partners at noon today. If you can send them a reminder today that would be great, thanks!

Here's the language I used if you want to adapt it:  
-Sam

---

Hello Partners,

We hope you are doing well and wanted to send a friendly reminder about the Draft Community Violence Prevention Resource for Action. If you have not already done so, please send us your feedback by Tuesday July 11<sup>th</sup> to Embree Moore [nvx3@cdc.gov](mailto:nvx3@cdc.gov) and Samantha McKeithan [ypl0@cdc.gov](mailto:ypl0@cdc.gov).

If you have any questions, we are more than happy to assist you.

**Subject:** FW: Guidance for Community Violence Prevention Resource for Action Review: Feedback Due July 11th

Dear Colleagues,

I am writing to let you know that we have reached a milestone in the update and expansion of the Youth Violence Prevention Technical Package that you developed. We are at a point where we are sharing a draft with external partners for their review. We are providing the following explanation that you might find helpful: **"The Community Violence Prevention Resource for Action: A Compilation of the Best Available Evidence for Youth and Young Adults** updates and expands on the 2016, [Comprehensive Technical Package for the Prevention of Youth Violence and Associated Risk Behaviors](#), one of a suite of violence prevention resources developed by DVP over the past several years to help communities make use of the best available evidence. Previously, these resources were called "technical packages" but are now referred to as "prevention resources." The **Community Violence Prevention Resource for Action** includes a select group of strategies based on the best available evidence to help communities and states sharpen their focus on approaches with the greatest potential to reduce community violence (including the most serious forms of violence) and inequities in risk for violence."

Here's a high-level overview of what the resource includes:

- We center communities, including youth and young people and those with lived experience, throughout the resource.
- We emphasize the social and structural inequities that drive risk for violence, particularly for racial and ethnic minority groups.
- We have new guidance about correcting harmful narratives and avoiding stigmatizing language.
- We reviewed the latest evidence on the examples that were in the 2016 Youth Violence Technical Package and updated the summaries and evidence descriptions as needed.
- We added new examples and expanded the emphasis on the potential to advance equity.

We hosted a webinar yesterday with external partners who expressed interest in reviewing the draft resource. The partners include a mix of practitioners, researchers, and federal colleagues. Below is the email that we sent and attached is the draft resource and the slides that we used in the webinar. We thought you might like to see the updated version and, if you have time, we welcome any suggestions that you might have. Please use the approach described in the email below to share any comments.

We acknowledge you as the authors of the 2016 YV TP on the authorship page. The CV prevention resource is the second TP to be updated. The first was the [Suicide Prevention Resource for Action](#)

[cdc.gov](https://www.cdc.gov)) and we adapted the approach that they used to acknowledge authors across the two editions.

Please let me know if you have any questions. Thank you for your support and for providing such a strong and lasting foundation for this work!

-Tom

\*\*\*\*\*

Hello Partners,

On behalf of the Centers for Disease Control and Prevention's Division of Violence Prevention (DVP), thank you for agreeing to review a draft of CDC's forthcoming **Community Violence Prevention Resource for Action: A Compilation of the Best Available Evidence for Youth and Young Adults**.

#### Guidance for Review:

- Attached is a PDF of the draft resource and the webinar slides to aid in your review.
- Later today, you should receive a separate email from Zoom with the email subject line: **Ebone Velasco shared a recording with you** with the webinar recording. If you do not received it, please contact Samantha McKeithan [ypl0@cdc.gov](mailto:ypl0@cdc.gov) and Ebone Velasco [otv9@cdc.gov](mailto:otv9@cdc.gov)
- Please send your feedback to Samantha McKeithan, [ypl0@cdc.gov](mailto:ypl0@cdc.gov) and Embree Moore [nvx3@cdc.gov](mailto:nvx3@cdc.gov) by **Tuesday July 11<sup>th</sup>**. If you need more time to submit comments, please reach out to us.
- We ask that reviewers **do not** forward the draft resource, webinar recording or slides beyond the review group.
- Note this document is not intended to be implementation guidance. CDC provides resources communities can use when selecting and implementing prevention strategies in [Violence Prevention in Practice](#).

#### Considerations for Providing Feedback

- In your feedback, please let us know your impressions of what's good, what's missing, what might be dropped, whether anything is unclear, and other important information that can inform this resource.
- To help us at CDC organize all comments and ensure that your feedback is received, we suggest sending us a separate Word document that includes the following:
  - **Name(s) & Organization of Reviewer(s) for Acknowledgement**
    - *If more than one individual from an organization will be commenting, we ask for all comments to be combined into one Word document per organization and include the names of all individual reviewers. Please title your document as: **CV Prevention Resource for Action: (ORGANIZATION NAME) Review***
  - **Section & Page # for specific comments**

- *We ask that reviewers please identify the section and page number associated with your comments in the Word document, when applicable. We won't be able to accept tracked changes or comments within the body of the PDF draft resource.*

We greatly appreciate your commitment as our partners who work every day to prevent community violence. Your input will help ensure we provide a resource that is relevant and actionable for preventing community violence and eliminating inequities in risk for community violence.

As a reminder, please send us your feedback by **Tuesday July 11th**.

Thank you,

-Sam

**Subject:** FW: Guidance for Community Violence Prevention Resource for Action Review: Feedback Due July 11th

Hi Thomas,

We enjoyed talking with you last week and learning more about your work at the VRC and your important CV prevention efforts in cities. My father was just visiting from St. Louis this weekend, and he described the substantial concerns that he has been hearing about violence in the city. I hope that you get a chance to provide some guidance to leadership there.

I mentioned that we are in the process of updating and expanding what was the [Youth Violence Prevention](#) technical package to focus on Community Violence Prevention. We have circulated a draft version of the updated resource to a diverse group of researchers, practitioners, and partners. I would also welcome your informal review if you have the time to offer suggestions for ways to make this more useful to communities. I have attached the draft resource here. Also, we hosted a webinar with some partners a few weeks ago to describe our goals and the changes made, and I have attached the slides from that as well. The email below describes the formal review process and timeline. It would be most helpful to receive any suggestions by 7/11, if possible.

Thank you for considering this! I look forward talking further about a possible webinar on the work of the VRC for CDC staff. I think this will be very interesting to a range of staff in DVP. Could we start to plan for something toward the end of the year?

-Tom

Hello Partners,

On behalf of the Centers for Disease Control and Prevention's Division of Violence Prevention (DVP), thank you for agreeing to review a draft of CDC's forthcoming **Community Violence Prevention Resource for Action: A Compilation of the Best Available Evidence for Youth and Young Adults**.

#### Guidance for Review:

- Attached is a PDF of the draft resource and the webinar slides to aid in your review.
- Later today, you should receive a separate email from Zoom with the email subject line: **Ebone Velasco shared a recording with you** with the webinar recording. If you do not receive it, please contact Samantha McKeithan [ypi0@cdc.gov](mailto:ypi0@cdc.gov) and Ebone Velasco [otv9@cdc.gov](mailto:otv9@cdc.gov)
- Please send your feedback to Samantha McKeithan, [ypi0@cdc.gov](mailto:ypi0@cdc.gov) and Embree Moore [nvx3@cdc.gov](mailto:nvx3@cdc.gov) by **Tuesday July 11<sup>th</sup>**. If you need more time to submit comments, please reach out to us.
- We ask that reviewers **do not** forward the draft resource, webinar recording or slides beyond the review group.
- Note this document is not intended to be implementation guidance. CDC provides resources communities can use when selecting and implementing prevention strategies in [Violence Prevention in Practice](#).

#### Considerations for Providing Feedback

- In your feedback, please let us know your impressions of what's good, what's missing, what might be dropped, whether anything is unclear, and other important information that can inform this resource.
- To help us at CDC organize all comments and ensure that your feedback is received, we suggest sending us a separate Word document that includes the following:
  - **Name(s) & Organization of Reviewer(s) for Acknowledgement**

- *If more than one individual from an organization will be commenting, we ask for all comments to be combined into one Word document per organization and include the names of all individual reviewers. Please title your document as: **CV Prevention Resource for Action: (ORGANIZATION NAME) Review***
- **Section & Page # for specific comments**
  - *We ask that reviewers please identify the section and page number associated with your comments in the Word document, when applicable. We won't be able to accept tracked changes or comments within the body of the PDF draft resource.*

We greatly appreciate your commitment as our partners who work every day to prevent community violence. Your input will help ensure we provide a resource that is relevant and actionable for preventing community violence and eliminating inequities in risk for community violence.

As a reminder, please send us your feedback by **Tuesday July 11th**.

Thank you,

-Sam

**Subject:** RE: Guidance for Community Violence Prevention Resource for Action Review: Feedback Due July 11th

No worries! Yes, there are place-holders in the overview section that indicate roughly where the call-out boxes would go. The text of what would be in those boxes is provided on pages 17-19.

Lol sorry Denise one more question we received from Allison:

In addition to the request to provide a PDF version of the resource that includes line numbers, our reviewer inquired about text related to the break out boxes. **Can you please confirm that the text on PDF pgs. 17-19 is what is planning on being displayed in the call out boxes.**

-Sam

Hi Denise,

I just received this email from our partner at American Academy of Pediatrics if we can share out a PDF version of the draft resource with line numbers- is that something we can do today? Happy to get on a quick call if helpful.

**Subject:** Guidance for Community Violence Prevention Resource for Action Review: Feedback Due July 11th

Hello Partners,

On behalf of the Centers for Disease Control and Prevention's Division of Violence Prevention (DVP), thank you for agreeing to review a draft of CDC's forthcoming **Community Violence Prevention Resource for Action: A Compilation of the Best Available Evidence for Youth and Young Adults**.

#### Guidance for Review:

- Attached is a PDF of the draft resource and the webinar slides to aid in your review.
- Later today, you should receive a separate email from Zoom with the email subject line: **Ebone Velasco shared a recording with you** with the webinar recording. If you do not received it, please contact Samantha McKeithan [ypl0@cdc.gov](mailto:ypl0@cdc.gov) and Ebone Velasco [otv9@cdc.gov](mailto:otv9@cdc.gov)
- Please send your feedback to Samantha McKeithan, [ypl0@cdc.gov](mailto:ypl0@cdc.gov) and Embree Moore [nvx3@cdc.gov](mailto:nvx3@cdc.gov) by **Tuesday July 11<sup>th</sup>**. If you need more time to submit comments, please reach out to us.
- We ask that reviewers **do not** forward the draft resource, webinar recording or slides beyond the review group.
- Note this document is not intended to be implementation guidance. CDC provides resources communities can use when selecting and implementing prevention strategies in [Violence Prevention in Practice](#).

#### Considerations for Providing Feedback

- In your feedback, please let us know your impressions of what's good, what's missing, what might be dropped, whether anything is unclear, and other important information that can inform this resource.
- To help us at CDC organize all comments and ensure that your feedback is received, we suggest sending us a separate Word document that includes the following:

- **Name(s) & Organization of Reviewer(s) for Acknowledgement**
  - *If more than one individual from an organization will be commenting, we ask for all comments to be combined into one Word document per organization and include the names of all individual reviewers. Please title your document as: **CV Prevention Resource for Action: (ORGANIZATION NAME) Review***
  
- **Section & Page # for specific comments**
  - *We ask that reviewers please identify the section and page number associated with your comments in the Word document, when applicable. We won't be able to accept tracked changes or comments within the body of the PDF draft resource.*

We greatly appreciate your commitment as our partners who work every day to prevent community violence. Your input will help ensure we provide a resource that is relevant and actionable for preventing community violence and eliminating inequities in risk for community violence.

As a reminder, please send us your feedback by **Tuesday July 11th**.

Thank you,

-Sam

Hi Tom

Thanks so much for your email! I apologize for the delayed response, I just got back from the Gifford's conference late last night.

I would be more than happy to review and share my feedback. Thank you for having me in mind, I appreciate the opportunity to engage and support your work!

Kathryn

**Subject:** FW: Guidance for Community Violence Prevention Resource for Action Review: Feedback Due July 11th

Hi Kathryn,

I have been meaning to reach out to you about the possibility of you reviewing the updated community violence prevention resource that we are developing at CDC. I mentioned this to you after the panel that we did for AHCJ because I thought that your review of the content related to street outreach would be very helpful, particularly given the challenges in implementing these programs well and sustaining them in a way that is supportive for the outreach workers/interrupters. There are many examples in the resource and each description is brief, including the content on street outreach, so there is not much space to fully describe the issues. That said, if you have suggestions for additional points that are critical or references to add, we would welcome that. Feel free to comment on the other sections as well. I understand if you do not have time to review this, but I wanted to follow up with you because the points that you made during the panel stayed with me!

I have attached the draft resource here. Also, we hosted a webinar with some partners yesterday to describe our goal and the changes and the slides are attached. The email below describes the review process and timeline.

Thank you!

-Tom

Hello Partners,

On behalf of the Centers for Disease Control and Prevention's Division of Violence Prevention (DVP), thank you for agreeing to review a draft of CDC's forthcoming **Community Violence Prevention Resource for Action: A Compilation of the Best Available Evidence for Youth and Young Adults**.

Guidance for Review:

- Attached is a PDF of the draft resource and the webinar slides to aid in your review.
- Later today, you should receive a separate email from Zoom with the email subject line: **Ebone Velasco shared a recording with you** with the webinar recording. If you do not received it, please contact Samantha McKeithan [ypl0@cdc.gov](mailto:ypl0@cdc.gov) and Ebone Velasco [otv9@cdc.gov](mailto:otv9@cdc.gov)
- Please send your feedback to Samantha McKeithan, [ypl0@cdc.gov](mailto:ypl0@cdc.gov) and Embree Moore [nvx3@cdc.gov](mailto:nvx3@cdc.gov) by **Tuesday July 11<sup>th</sup>**. If you need more time to submit comments, please reach out to us.
- We ask that reviewers **do not** forward the draft resource, webinar recording or slides beyond the review group.
- Note this document is not intended to be implementation guidance. CDC provides resources communities can use when selecting and implementing prevention strategies in [Violence Prevention in Practice](#).

Considerations for Providing Feedback

- In your feedback, please let us know your impressions of what's good, what's missing, what might be dropped, whether anything is unclear, and other important information that can inform this resource.
- To help us at CDC organize all comments and ensure that your feedback is received, we suggest sending us a separate Word document that includes the following:
  - **Name(s) & Organization of Reviewer(s) for Acknowledgement**
    - *If more than one individual from an organization will be commenting, we ask for all comments to be combined into one Word document per organization and include the names of all individual reviewers. Please title your document as: **CV Prevention Resource for Action: (ORGANIZATION NAME) Review***
  - **Section & Page # for specific comments**
    - *We ask that reviewers please identify the section and page number associated with your comments in the Word document, when applicable. We won't be able to accept tracked changes or comments within the body of the PDF draft resource.*

We greatly appreciate your commitment as our partners who work every day to prevent community violence. Your input will help ensure we provide a resource that is relevant and actionable for preventing community violence and eliminating inequities in risk for community violence.

As a reminder, please send us your feedback by **Tuesday July 11th**.

Thank you,

-Sam

**Subject:** FW: Guidance for Community Violence Prevention Resource for Action Review: Feedback Due July 11th

Dear Colleagues,

I am writing to let you know that we have reached a milestone in the update and expansion of the Youth Violence Prevention Technical Package that you developed. We are at a point where we are sharing a draft with external partners for their review. We are providing the following explanation that you might find helpful: **"The Community Violence Prevention Resource for Action: A Compilation of the Best Available Evidence for Youth and Young Adults** updates and expands on the 2016, [Comprehensive Technical Package for the Prevention of Youth Violence and Associated Risk Behaviors](#), one of a suite of violence prevention resources developed by DVP over the past several years to help communities make use of the best available evidence. Previously, these resources were called "technical packages" but are now referred to as "prevention resources." The **Community Violence Prevention Resource for Action** includes a select group of strategies based on the best available evidence to help communities and states sharpen their focus on approaches with the greatest potential to reduce community violence (including the most serious forms of violence) and inequities in risk for violence."

Here's a high-level overview of what the resource includes:

- We center communities, including youth and young people and those with lived experience, throughout the resource.
- We emphasize the social and structural inequities that drive risk for violence, particularly for racial and ethnic minority groups.
- We have new guidance about correcting harmful narratives and avoiding stigmatizing language.
- We reviewed the latest evidence on the examples that were in the 2016 Youth Violence Technical Package and updated the summaries and evidence descriptions as needed.
- We added new examples and expanded the emphasis on the potential to advance equity.

We hosted a webinar yesterday with external partners who expressed interest in reviewing the draft resource. The partners include a mix of practitioners, researchers, and federal colleagues. Below is the email that we sent and attached is the draft resource and the slides that we used in the webinar. We thought you might like to see the updated version and, if you have time, we welcome any suggestions that you might have. Please use the approach described in the email below to share any comments.

We acknowledge you as the authors of the 2016 YV TP on the authorship page. The CV prevention resource is the second TP to be updated. The first was the [Suicide Prevention Resource for Action \(cdc.gov\)](https://www.cdc.gov/suicide-prevention-resource-for-action/) and we adapted the approach that they used to acknowledge authors across the two editions.

Please let me know if you have any questions. Thank you for your support and for providing such a strong and lasting foundation for this work!

-Tom

Hi Jeff,

Thank you for reaching out! I have been very busy too, but I see the light at the end of the tunnel. Having the senior firearm SME in place is going to be very helpful. I have been doing most of that work myself since Linda retired.

Would you be up for getting a meal (or a drink) together some time soon?

-Tom

**Subject:** FW: Guidance for Community Violence Prevention Resource for Action Review: Feedback Due July 11th

Hi Chris, Amy, and Derrick,

We hosted the webinar yesterday with external partners who expressed interest in reviewing the draft CV prevention resource. The partners include a mix of practitioners, researchers, and federal colleagues. Below is the email that we sent and attached is the draft resource and the slides that we used in the webinar. As we discussed in the OD3 meeting, this is a pre-clearance review and we are expecting substantive changes. We welcome your comments at this stage as well as in the later formal clearance process.

Thank you for your support!

-Tom

\*\*\*\*\*

Hello Partners,

On behalf of the Centers for Disease Control and Prevention's Division of Violence Prevention (DVP), thank you for agreeing to review a draft of CDC's forthcoming **Community Violence Prevention Resource for Action: A Compilation of the Best Available Evidence for Youth and Young Adults**.

#### Guidance for Review:

- Attached is a PDF of the draft resource and the webinar slides to aid in your review.
- Later today, you should receive a separate email from Zoom with the email subject line: **Ebone Velasco shared a recording with you** with the webinar recording. If you do not received it, please contact Samantha McKeithan [ypl0@cdc.gov](mailto:ypl0@cdc.gov) and Ebone Velasco [otv9@cdc.gov](mailto:otv9@cdc.gov)
- Please send your feedback to Samantha McKeithan, [ypl0@cdc.gov](mailto:ypl0@cdc.gov) and Embree Moore [nvx3@cdc.gov](mailto:nvx3@cdc.gov) by **Tuesday July 11<sup>th</sup>**. If you need more time to submit comments, please reach out to us.
- We ask that reviewers **do not** forward the draft resource, webinar recording or slides beyond the review group.
- Note this document is not intended to be implementation guidance. CDC provides resources communities can use when selecting and implementing prevention strategies in [Violence Prevention in Practice](#).

#### Considerations for Providing Feedback

- In your feedback, please let us know your impressions of what's good, what's missing, what might be dropped, whether anything is unclear, and other important information that can inform this resource.
- To help us at CDC organize all comments and ensure that your feedback is received, we suggest sending us a separate Word document that includes the following:
  - **Name(s) & Organization of Reviewer(s) for Acknowledgement**
    - *If more than one individual from an organization will be commenting, we ask for all comments to be combined into one Word document per organization and*

*include the names of all individual reviewers. Please title your document as: CV Prevention Resource for Action: (ORGANIZATION NAME) Review*

- **Section & Page # for specific comments**
  - *We ask that reviewers please identify the section and page number associated with your comments in the Word document, when applicable. We won't be able to accept tracked changes or comments within the body of the PDF draft resource.*

We greatly appreciate your commitment as our partners who work every day to prevent community violence. Your input will help ensure we provide a resource that is relevant and actionable for preventing community violence and eliminating inequities in risk for community violence.

As a reminder, please send us your feedback by **Tuesday July 11th**.

Thank you,

-Sam

Thanks for the reminder Tom! I've added comments to the attached version for your consideration. I thought the slides looked good but some of my comments could apply to the slides as well.

Regards,  
DWG

Hey Tom,

I got sidetracked over last couple of weeks with other fires to put out. Can I send you something by end of day on Thursday?

Chris

Hi Chris, Amy, and Derrick,

We are starting to review the comments that we received from external partners and wanted to check with you to see if you have any comments for us as we work on revisions.

If possible, your input now could be particularly helpful.

Thank you!

-Tom
